

TECHNOLOGY & COSTS**TECHNOECONOMICS - ENERGY & CHEMICALS (TECH)****TECH 2018S12 Thermal Energy Storage (TES)**

Table of Contents

A Report by **Nexant, Inc.**

Published Date: December 2018

www.nexantsubscriptions.com**Contents**

1	Executive Summary	1
1.1	Objective of the Report	1
1.1.1	Defining TES.....	1
1.1.2	Sources for TES.....	1
1.1.3	Opportunity for TES.....	1
1.2	Introduction.....	2
1.3	Roadmap for Thermal Energy Storage	3
1.4	Technologies and Applications.....	3
1.5	Market Assessment, Trends, and Outlook.....	4
1.6	Costs and Techno-Economics	6
1.7	Case Studies	7
1.8	Conclusion.....	8
2	Introduction	9
2.1	Objective	9
2.1.1	Structure of Report.....	9
2.1.2	Recommendations for Specific TES Projects.....	10
2.1.3	Approach and Methodology.....	11
2.2	Historical Perspective	12
2.2.1	Industrial Age	12
2.2.2	Post World War II	12
2.2.3	Growing Environmental Concerns	12
2.2.4	Increased Role of Natural Gas.....	13
2.3	Emphasis on Energy Storage.....	13
2.3.1	Shift to Clean Energy	13
2.3.2	Relevance of Energy Storage.....	13
2.3.3	Classification of Energy Storage.....	15
2.3.4	Maturity of Technologies	17
2.4	Rationale for TES	18
2.4.1	What is TES?	18
2.4.2	Sources for TES.....	19
2.5	Benefits of TES.....	19

2.5.1	Opportunity	19
2.5.2	Better Economics	20
2.5.3	Enhanced Energy Management	20
2.6	TES Technologies and End-Use Applications	21
2.6.1	Technologies.....	21
2.6.2	Types of End-Use Applications.....	21
2.7	Outlook.....	22
2.7.1	Overview.....	22
2.7.2	Increased Role and Market Share	22
2.8	Conclusions.....	22
3	Roadmap for Thermal Energy Storage	23
3.1	Improvement in Energy Utilization.....	23
3.2	Integrated Energy Assessment	24
3.3	The Roadmap for TES.....	25
3.4	Potential TES Technology Impacts	27
3.5	Performance Criteria for TES Technologies	27
3.6	Conclusions.....	28
4	Technologies and Applications	29
4.1	Emphasis on Sustainable Energy.....	29
4.2	Energy Storage.....	29
4.2.1	Systems Approach	29
4.2.2	Technologies.....	30
4.2.3	End-Use Applications.....	30
4.3	Suitability of Energy Storage.....	32
4.4	Role of Specific Locations.....	33
4.5	Focusing on TES.....	33
4.5.1	Defining TES.....	33
4.5.2	TES is Well-Positioned.....	34
4.5.3	Key Role for TES	34
4.6	Deploying TES.....	34
4.6.1	Key Technology Variables.....	34
4.6.2	TES Integrated with Heating Technologies	35
4.6.3	Solar Thermal Power.....	37
4.6.4	Combined Heat and Power.....	40
4.6.5	Waste Heat Recovery	42
4.7	TES Integration with CAES.....	47
4.8	Assessment of TES Technologies.....	48
4.8.1	Temperature – A Key Property for TES	48
4.8.2	Three Categories or Forms of TES	48
4.8.3	Duration and Discharge Cycles	54
4.8.4	System Efficiencies, Technology Interaction and Barriers	54
4.8.5	Comparison of TES Technologies	56
4.9	Technology Readiness Levels	57
4.9.1	Purpose and Rankings	57
4.9.2	TRLs of Various TES Technologies.....	58

4.10	Conclusions.....	59
5	Market Assessment, Trends, and Outlook	60
5.1	Historical and Current Trends	60
5.1.1	Overview.....	60
5.1.2	U.S. Trends.....	60
5.2	Focus on TES Markets	60
5.2.1	Energy Storage Mix Growth to Date	61
5.2.2	TES Growth to Date	62
5.2.3	Storage Locations	63
5.2.4	Future Storage Growth Projections.....	63
5.2.5	Future Development and Growth Scenario	63
5.2.6	Ownership Segmentation	64
5.3	Market Barriers for TES Technologies.....	64
5.4	Demand Drivers and Key Dynamics.....	65
5.4.1	Drivers	65
5.4.2	Competition for TES.....	66
5.4.3	Incentives for Investments in TES	66
5.5	Risks	67
5.5.1	Regulatory, Legislative, and Political	67
5.5.2	Volume or Development Risk	67
5.6	Key Gaps	67
5.6.1	Overview.....	67
5.7	Future Outlook.....	68
5.8	Conclusions.....	69
6	Costs and Techno-Economics.....	70
6.1	Evaluation Methods for Energy Storage Technologies	70
6.1.1	Long-Term Returns	70
6.1.2	Cost Modelling	70
6.1.3	Cost Implication of Emissions or Avoided Emissions.....	71
6.1.4	Securing a Viable and Bankable Revenue Stream.....	71
6.1.5	Impact of Commodity Costs and Availability	71
6.1.6	Diminishing Returns	72
6.1.7	Capital Investment Operational Costs.....	72
6.1.8	Specific Investment Costs	72
6.1.9	Levelized Cost of Storage	72
6.2	Challenges and Limitations for Evaluating TES Technologies	75
6.3	Current Evaluation Methods for TES Technologies	76
6.3.1	Capital Costs.....	76
6.3.2	Operations and Maintenance Costs.....	77
6.3.3	Future Cost Reduction Potential	77
6.4	Benchmarking and Comparative Analysis	78
6.5	Preliminary Economic Analysis	79
6.5.1	Initial Incremental Investment Cost	79
6.5.2	Incremental O&M Cost	80
6.5.3	Benefit-Cost Assessment and Selection of Improvement Measures	80

6.6	Techno-Economic Feasibility Assessment	80
6.6.1	Energy, Cost, and Environmental Assessment	80
6.6.2	Cost-Effectiveness of TES Project	80
6.7	Implementation Planning	81
6.7.1	Preliminary Budget for the Overall Cost of Implementing the Proposed Measure	81
6.7.2	Implementation Schedule	81
6.7.3	Capital Investment Plan and Milestone Schedule for Construction Project Financing	81
6.8	Methods for Project Economic Assessment.....	81
6.8.1	Benefit-Cost Analysis Method.....	82
6.9	Conclusions.....	85
7	Case Studies.....	86
7.1	Introduction.....	86
7.2	Chilled Water Thermal Storage	87
7.2.1	Case Study 1 – Goldman Sachs Manhattan Headquarters	87
7.2.2	Case Study 2 – Bucknell University	88
7.2.3	Case Study 3 – Disney California Adventure	89
7.2.4	Case Study 4 – University of California at Irvine	90
7.2.5	Case Study 5 – Philadelphia Power Generation.....	91
7.3	Heat Thermal Storage.....	92
7.3.1	Case Study 1 – Marine Corps Logistics Base	92
7.3.2	Case Study 2 – Halotechnics Advanced Molten Glass	93
7.3.3	Case Study 3 – Holaniku at Keahole Point.....	94
7.4	Ice Thermal Storage	95
7.4.1	Case Study 1 – Redding Electric Utilities	95
7.4.2	Case Study 2 – Pueblo Air Cooled Run Test Facility.....	96
7.4.3	Case Study 3 – Nissan Technical Center North America.....	97
7.4.4	Case Study 4 – University of Arizona.....	98
7.4.5	Case Study 5 – Nordstrom (Ala Moana Center)	99
7.5	Molten Salt Thermal Storage.....	100
7.5.1	Case Study 1 – Solana Solar Generating Plant.....	100
7.5.2	Case Study 2 – Crescent Dunes Solar Energy Project.....	101
7.6	Integrated Thermal Energy Storage System – Johnston Controls.....	102
7.7	Conclusions.....	106
8	Glossary.....	107

Appendices

A	TECH Program Title Index (2007 - 2018).....	111
B	References	116

Figures

Figure 1	Key Benefits of TES.....	2
Figure 2	Main Classifications of Energy Storage Technologies.....	2
Figure 3	Roadmap for TES	3
Figure 4	Heating Technologies Interacting with TES	4
Figure 5	United States Energy Storage Mix Growth	5
Figure 6	U.S. TES Growth	5
Figure 7	Structuring of LCOS.....	6
Figure 8	Profile of Energy Demand with Impact of Storage.....	14
Figure 9	Main Classifications of Energy Storage Technologies.....	15
Figure 10	Wide Range of Energy Storage Technologies	16
Figure 11	Maturity of Energy Storage Technologies	18
Figure 12	Key Benefits of TES.....	20
Figure 13	Example of Energy Losses in Process Industrial Facilities	23
Figure 14	Roadmap for TES	25
Figure 15	Power Requirements versus Discharge Duration.....	32
Figure 16	Potential Deployment of Energy Storage	33
Figure 17	Heating Technologies and TES.....	35
Figure 18	Concentrating Solar Power (CSP) Facility	38
Figure 19	Typical CHP System Configuration	40
Figure 20	Typical Conventional Waste Heat Recovery Systems.....	43
Figure 21	Energy Loss Diagram in a Fuel-Based Process Heating System	44
Figure 22	Integration of TES with CAES	47
Figure 23	Three Categories or Forms of TES.....	48
Figure 24	Sensible TES Technologies	49
Figure 25	Viable Integration of BTES.....	50
Figure 26	Building and Facilities Applications for ATES.....	51
Figure 27	THS Technology Process.....	53
Figure 28	Maturity of TES Technologies	58
Figure 29	Global Energy Storage Mix Growth	61
Figure 30	United States Energy Storage Mix Growth	61
Figure 31	Global TES Growth	62
Figure 32	U.S. TES Growth	62
Figure 33	Levelized Cost of Storage (LCOS)	72
Figure 34	Structuring of LCOS.....	74
Figure 35	Key Influencing Factors.....	75
Figure 36	Existing Chiller System with ITESS	104
Figure 37	Commercial ITESS	106

Nexant Inc.

TECHNOLOGY & COSTS

Technoeconomics - Energy & Chemicals (TECH)

Thermal Energy Storage (TES)

The Nexant Subscriptions' Technoeconomics - Energy & Chemicals (TECH) program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. Technoeconomics - Energy & Chemicals (TECH) reports are available as a subscription program or on a single report basis.

Contact Details:

Americas:

Marcos Nogueira Cesar, Vice President, Global Products, E&CA: Nexant Subscriptions
Phone: + 1-914-609-0324, e-mail: mcesar@nexant.com

Erica Hill, Client Services Coordinator, E&CA-Products
Phone: + 1-914-609-0386, e-mail: ehill@nexant.com

EMEA:

Anna Ibbotson, Director, Nexant Subscriptions
Phone: +44-207-950-1528, aibbotson@nexant.com

Asia:

Chommanad Thammanayakatip, Managing Consultant, Energy & Chemicals Advisory
Phone: +66-2793-4606, email: chommanadt@nexant.com

Nexant, Inc. (www.nexant.com) is a leading management consultancy to the global energy, chemical, and related industries. For over 38 years, Nexant has helped clients increase business value through assistance in all aspects of business strategy, including business intelligence, project feasibility and implementation, operational improvement, portfolio planning, and growth through M&A activities. Nexant has its main offices in San Francisco (California), White Plains (New York), and London (UK), and satellite offices worldwide.
