|       |                                                        |    |
|-------|--------------------------------------------------------|----|
| 1     | Executive Summary .....                                | 1  |
| 1.1   | Introduction and Scope .....                           | 1  |
| 1.2   | Carbon Materials Applications .....                    | 2  |
| 1.3   | Carbon Materials Feedstocks .....                      | 3  |
| 1.4   | Carbon Materials Manufacturing .....                   | 4  |
| 1.5   | Advances in Carbon Materials Technology.....           | 5  |
| 1.6   | Process Economics.....                                 | 6  |
| 1.7   | Strategic Overview .....                               | 7  |
| 1.7.1 | Sector Trends.....                                     | 7  |
| 1.7.2 | Decarbonization and Environmental Policy Effects ..... | 7  |
| 1.7.3 | Effect of COVID-19 Pandemic .....                      | 8  |
| 2     | Introduction.....                                      | 9  |
| 2.1   | Scope of this Report.....                              | 10 |
| 2.2   | Sector Overview .....                                  | 10 |
| 2.3   | Business and Strategic Considerations .....            | 11 |
| 2.4   | Business Developments.....                             | 14 |
| 2.5   | Lithium-Ion Battery Carbon Materials.....              | 17 |
| 2.5.1 | Graphite and Graphitic Materials .....                 | 17 |
| 2.5.2 | Graphene and Carbon Nanotubes .....                    | 21 |
| 2.5.3 | Conductive Carbon Black.....                           | 22 |
| 3     | Carbon Materials Applications.....                     | 23 |
| 3.1   | Non-Battery Graphite and Carbon Materials Markets..... | 23 |
| 3.1.1 | Metallurgy .....                                       | 23 |
| 3.1.2 | Carbon Fiber .....                                     | 26 |
| 3.1.3 | Carbon Black.....                                      | 26 |
| 3.1.4 | Nuclear Materials .....                                | 27 |
| 3.1.5 | Other Applications .....                               | 29 |

|       |                                                                                 |     |
|-------|---------------------------------------------------------------------------------|-----|
| 3.2   | Carbon Applications in Lithium-Ion Batteries .....                              | 30  |
| 3.2.1 | Carbon as a Battery Anode Material .....                                        | 30  |
| 3.2.2 | Carbon Conductive Additives .....                                               | 40  |
| 3.2.3 | Amorphous Carbon Coatings .....                                                 | 44  |
| 3.2.4 | Threats to Carbon Applications .....                                            | 44  |
| 4     | Carbon Materials Feedstocks .....                                               | 50  |
| 4.1   | Mined Natural Graphite .....                                                    | 50  |
| 4.1.1 | Mining Methods .....                                                            | 50  |
| 4.1.2 | Beneficiation Methods .....                                                     | 54  |
| 4.2   | Feedstocks for Synthetic Structured Carbons .....                               | 62  |
| 4.2.1 | Hard and Soft Carbons .....                                                     | 62  |
| 4.2.2 | Petroleum Coke .....                                                            | 64  |
| 4.3   | Other Sources of Advanced Carbon Materials .....                                | 76  |
| 4.3.1 | Polyacrylonitrile .....                                                         | 76  |
| 4.3.2 | Biomass .....                                                                   | 77  |
| 4.3.3 | Recycling of Lithium-Ion Batteries .....                                        | 77  |
| 4.3.4 | Kish (Steelmaking Waste) .....                                                  | 78  |
| 5     | Manufacturing Carbon Materials .....                                            | 79  |
| 5.1   | Synthetic Graphite Manufacturing (Acheson Process) .....                        | 80  |
| 5.1.1 | Chemistry .....                                                                 | 82  |
| 5.1.2 | Process Description .....                                                       | 85  |
| 5.2   | Carbon Material Purification Processes .....                                    | 94  |
| 5.2.1 | Pyrometallurgical Processes .....                                               | 94  |
| 5.2.2 | Hydrometallurgical Purification .....                                           | 96  |
| 5.3   | Commercial Spherical Graphite Manufacturing .....                               | 102 |
| 5.3.1 | Overview .....                                                                  | 102 |
| 5.3.2 | Process Description .....                                                       | 104 |
| 5.4   | Spherical Graphite Coating, Conditioning and Formulation .....                  | 105 |
| 5.5   | Manufacturing of Conductive Carbon Black .....                                  | 106 |
| 5.5.1 | Chemistry .....                                                                 | 106 |
| 5.5.2 | Process Description .....                                                       | 107 |
| 6     | Developments in Advanced Carbon Materials Technology .....                      | 109 |
| 6.1   | Carbochlorination Purification .....                                            | 110 |
| 6.1.1 | Chemistry .....                                                                 | 110 |
| 6.1.2 | Current Industry Experience .....                                               | 110 |
| 6.1.3 | Commercialization Announcements .....                                           | 111 |
| 6.1.4 | Process Analysis .....                                                          | 111 |
| 6.2   | Sodium Hydroxide Roast Fining (Caustic Roast Fining) .....                      | 117 |
| 6.2.1 | Current Industry Experience .....                                               | 117 |
| 6.2.2 | Commercialization Announcements .....                                           | 117 |
| 6.2.3 | Process Analysis .....                                                          | 117 |
| 6.3   | Developments in Mechanical Processing in Spherical Graphite Manufacturing ..... | 118 |

|       |                                                               |     |
|-------|---------------------------------------------------------------|-----|
| 6.4   | Other Developments .....                                      | 120 |
| 7     | Process Economics .....                                       | 121 |
| 7.1   | Costing Basis .....                                           | 121 |
| 7.1.1 | Investment Basis .....                                        | 121 |
| 7.1.2 | Pricing Basis.....                                            | 121 |
| 7.1.3 | Cost of Production Basis .....                                | 123 |
| 7.2   | Cost of Production Analysis .....                             | 123 |
| 7.2.1 | Spherical Graphite from Natural Flake Graphite .....          | 124 |
| 7.2.2 | Spherical Graphite from Synthetic Graphite .....              | 127 |
| 8     | Strategic Overview .....                                      | 129 |
| 8.1   | General Outlook for Carbon Materials End Uses.....            | 129 |
| 8.1.1 | Anodic Materials.....                                         | 129 |
| 8.1.2 | Conductive Additives.....                                     | 135 |
| 8.2   | Policy Environment.....                                       | 136 |
| 8.2.1 | Decarbonization .....                                         | 136 |
| 8.2.2 | Non-Climate Change Chinese Environmental Policy Changes ..... | 139 |
| 8.3   | Effect of COVID-19 Pandemic .....                             | 139 |

## Appendices

|   |                                                                     |     |
|---|---------------------------------------------------------------------|-----|
| A | Definitions of Capital Cost Terms Used in Process Economics.....    | 142 |
| B | Definitions of Operating Cost Terms Used in Process Economics ..... | 147 |
| C | TECH Program Title Index (2011-2021) .....                          | 150 |
| D | References .....                                                    | 153 |

## Figures

|           |                                                                                                               |    |
|-----------|---------------------------------------------------------------------------------------------------------------|----|
| Figure 1  | Summary of Spherical Graphite Value Chain.....                                                                | 2  |
| Figure 2  | Advanced Carbon Materials Applications and Supply Chains .....                                                | 3  |
| Figure 3  | Lithium-Ion Rechargeable Batteries Used in Portable Electronic Devices .....                                  | 9  |
| Figure 4  | Summary of Battery Anode Material Value Chain.....                                                            | 13 |
| Figure 5  | Crystal Structure of Graphite .....                                                                           | 18 |
| Figure 6  | Feedstocks for Selected Advanced Carbon Material Applications.....                                            | 23 |
| Figure 7  | Metallurgical Electrodes .....                                                                                | 24 |
| Figure 8  | Nuclear Graphite-Coated Pebble Bed Reactor Fuel Assembly .....                                                | 28 |
| Figure 9  | Schematic Representation of a Discharging Lithium-Ion Battery .....                                           | 30 |
| Figure 10 | Intercalation of Monovalent Cations in Graphite .....                                                         | 32 |
| Figure 11 | Scanning Electron Micrograph of Spherical Graphite .....                                                      | 34 |
| Figure 12 | Scanning Electron Micrographs of Graphite-Silicon Composite Anodic Materials<br>and Constituents.....         | 37 |
| Figure 13 | Scanning Electron Micrograph of Mesocarbon Microbeads (MCMB) .....                                            | 40 |
| Figure 14 | Linked Chain Structure of Conductive Acetylene Black .....                                                    | 43 |
| Figure 15 | Lithium Dendrite on Current Collector Surface in Solid Lithium Anode-using<br>Lithium-Ion Battery .....       | 46 |
| Figure 16 | Graphic Illustration of Volume Expansion of Silicon with Increased Lithium Loading .....                      | 48 |
| Figure 17 | Open Pit Mine .....                                                                                           | 52 |
| Figure 18 | Multiple Lift Open Stope Mining.....                                                                          | 53 |
| Figure 19 | Longitudinal Open Stope Mining .....                                                                          | 53 |
| Figure 20 | Single Lift Open Stope Mining.....                                                                            | 53 |
| Figure 21 | Cut and Fill Stope Mining .....                                                                               | 54 |
| Figure 22 | Sample Natural Graphite Beneficiation Train .....                                                             | 55 |
| Figure 23 | Scanning Electron Micrograph of Layered Structure of Flake Graphite.....                                      | 57 |
| Figure 24 | Attrition Mill, Showing Stator and Running Disc .....                                                         | 58 |
| Figure 25 | Flotation Cell Diagram .....                                                                                  | 59 |
| Figure 26 | Spiral Concentrators.....                                                                                     | 61 |
| Figure 27 | Illustration of Graphene Layer Geometry in Major Forms of Carbons .....                                       | 63 |
| Figure 28 | Morphology of Needle Coke .....                                                                               | 66 |
| Figure 29 | Morphology of Anode-Grade Cokes.....                                                                          | 67 |
| Figure 30 | Delayed Coking Process .....                                                                                  | 70 |
| Figure 31 | Rotary Kiln Calcination Process .....                                                                         | 72 |
| Figure 32 | Rotary Hearth Calcination Process .....                                                                       | 74 |
| Figure 33 | Vertical Shaft Kiln Calcination Process .....                                                                 | 76 |

## TECHNOLOGY & COSTS

# Technoeconomics - Energy & Chemicals (TECH)

The NexantECA Subscriptions' Technoeconomics - Energy & Chemicals (TECH) program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. Technoeconomics - Energy & Chemicals (TECH) reports are available as a subscription program or on a single report basis.

### Contact Details:

#### Americas:

Marcos Nogueira Cesar, Vice President, Global Subscriptions and Reports  
Phone: + 1-914-609-0324, e-mail: mcesar@NexantECA.com

Erica Hill, Client Services Coordinator, Subscriptions and Reports  
Phone: + 1-914-609-0386, e-mail: ehill@NexantECA.com

#### EMEA:

Anna Ibbotson, Vice President, Sales and Marketing  
Phone: +44-207-950-1528, aibbotson@NexantECA.com

#### Asia:

Chommanad Thammanayakatip, Managing Consultant  
Phone: +66-2793-4606, email: chommanadt@NexantECA.com

NexantECA Subscriptions and Reports provide clients with comprehensive analytics, forecasts and insights for the chemicals, polymers, energy and cleantech industries. Using a combination of business and technical expertise, with deep and broad understanding of markets, technologies and economics, NexantECA provides solutions that our clients have relied upon for over 50 years.
