Contents

1	Executive Summary	1
1.1	Introduction.....	1
1.2	Focus of the Study	1
1.3	Ranking of Technology Developers	2
1.4	Economic Analysis of Thermal Conversion Technologies and Petrochemical Production	5
1.4.1	Production Cost Estimates of Pyrolysis Products	5
1.4.2	Production Cost Estimates of Hydrothermal Treatment Products	6
1.4.3	Production Cost Estimates of Olefins from Pyrolysis Products	7
1.4.4	Production Cost Estimates of Olefins from Hydrothermal Cracking Products	9
1.4.5	Delivered Cost Competitiveness	10
1.4.6	Crude Oil Price Environment Effect on Thermal Conversion Profitability	11
1.5	Carbon Intensity Analysis.....	13
1.6	SWOT Analysis	14
1.7	Conclusions.....	15
2	Plastics Industry Overview	16
2.1	Current Market Dynamics of Plastics	16
2.1.1	Global Plastic Demand.....	16
2.2	Types of Plastics	19
2.2.1	Polyethylene	21
2.2.2	Polypropylene.....	24
2.2.3	Polyvinyl Chloride	25
2.2.4	Polyethylene Terephthalate	26
2.2.5	Polystyrene/Expandable Polystyrene.....	27
2.2.6	Others.....	28
2.3	Plastic Applications	29
2.3.1	Packaging.....	29

2.3.2	Building and Construction	35
2.3.3	Consumer Goods	37
2.3.4	Electrical & Electronics.....	38
2.3.5	Automotive	41
2.3.6	Agriculture	44
2.4	Prices of Virgin Plastics.....	44
2.4.1	Plastic Feedstock Costs	44
2.4.2	Virgin Plastic Prices.....	45
2.5	The Recycled Plastic Market.....	47
2.5.1	Drivers of Plastic Recycling.....	47
2.5.2	Plastic Recycled Transportation.....	49
2.5.3	Recycled Plastics Pricing	51
2.6	Sustainability in the Plastic Industry	53
3	Plastic Waste Overview.....	55
3.1	Waste Disposal Management Methods	55
3.1.1	Landfilling	57
3.1.2	Incineration	57
3.1.3	Recycling	57
3.2	Waste Supply Chain Stakeholders.....	59
3.2.1	Waste Haulers.....	59
3.2.2	Material Recovery Facilities	60
3.3	The Plastic Waste Landscape.....	66
3.3.1	Municipal Solid Waste	67
3.3.2	Plastic Value Chain	68
3.3.3	Plastic Waste Market.....	74
3.3.4	Plastic Recycling Rates.....	75
3.3.5	Consumer Packaged Good Commitments.....	76
3.3.6	Resin Producer Commitments	77
3.3.7	Major Plastics in the Plastic Waste Stream.....	78
3.3.8	Composition of Plastic Waste Stream.....	82
3.3.9	Contaminants of Plastic Waste Stream.....	83
3.3.10	Potential Markets for Key Plastic Waste	84
3.3.11	Plastic Bales	88
3.3.12	Plastic Waste Prices.....	92
3.3.13	Ways to Improve Plastic Collection	94
4	Advanced Recycling Processes	96
4.1	Introduction to Advanced Recycling	96
4.2	Advanced Recycling Classifications and Key Attributes	99
4.3	Advanced Recycling Legislation	107
4.3.1	North America	107
4.3.2	Western Europe	111
4.3.3	Asia Pacific.....	114

4.4	Advanced Recycling Capacity Analysis	118
4.4.1	North America	118
4.4.2	Western Europe	122
4.4.3	Asia Pacific	126
4.5	Introduction to Thermal Conversion Technologies	129
4.5.1	Pyrolysis	132
4.5.2	Hydrothermal Treatment	134
4.5.3	Gasification	136
4.6	Treatment of Thermal Conversion Products	138
4.6.1	Introduction	138
4.6.2	Axens/IFPEN	140
4.6.3	BASF	140
4.6.4	Neste	141
4.6.5	Sulzer	141
4.6.6	Technip Energies	142
4.7	Conversion of Plastic Waste-derived Materials into Petrochemicals	145
4.7.1	Olefins	146
4.7.2	Aromatics	148
4.8	Integration Schemes	150
5	Profiles of Thermal Conversion Technology Developers	154
5.1.1	Agilyx (Non-Catalytic)(237-246)	154
5.1.2	Alterra Energy (formerly Vadxx Energy) (Non-Catalytic)	158
5.1.3	Anellotech (Catalytic)	160
5.1.4	ARCUS Greencycling Technologies/Karlsruhe Institute of Technology (Non-Catalytic)	166
5.1.5	The Biofabrik Group (Non-Catalytic)	168
5.1.6	Braven Environmental (Non-Catalytic)	173
5.1.7	Brightmark (Non-Catalytic)	174
5.1.8	Clariter (Catalytic)(292-299)	177
5.1.9	Encina (Catalytic)(300-308)	179
5.1.10	Environmental Energy (Catalytic)	180
5.1.11	EnviroPower Renewable (Non-Catalytic)	184
5.1.12	ExxonMobil (Non-Catalytic)	186
5.1.13	Fuenix Ecogy/Dow (Non-Catalytic)	190
5.1.14	GreenMantra (Catalytic)	191
5.1.15	Honeywell (Non-Catalytic)	193
5.1.16	Klean Industries (Catalytic)(340-343)	197
5.1.17	Lummus Technology-New Hope Energy (Non-Catalytic)	200
5.1.18	LyondellBasell (MoReTec) with Karlsruhe Institute of Technology (Catalytic)	204
5.1.19	Mura-KBR (Non-Catalytic)	206
5.1.20	Nexus Circular (formerly Nexus Fuels) (Non-Catalytic)	211
5.1.21	OMV (Non-Catalytic)	212

5.1.22	Plastic Energy (Non-Catalytic)	214
5.1.23	Pyrowave (Catalytic)	220
5.1.24	QuantaFuel (Catalytic).....	220
5.1.25	RECENSO/CARBOLIQ (Catalytic).....	226
5.1.26	Recycling Technologies (Non-Catalytic)	229
5.1.27	Renew One (formerly Renewlogy) (Catalytic).....	232
5.2	Additional Technology Developers.....	237
6	Ranking of Profiled Technology Developers	239
6.1	Background (KT Decision-Making Model).....	239
6.2	Evaluation Criteria and Weighting	239
6.2.1	Investment Cost (ISBL)	240
6.2.2	Technology Status.....	241
6.2.3	Feedstock Flexibility	242
6.2.4	Product Usefulness	243
6.2.5	Patent Protection	244
6.3	Ranking Results	245
7	Economic Analysis of Thermal Conversion Technologies and Petrochemical Production	247
7.1	Economic Basis	247
7.1.1	Investment Basis	247
7.1.2	Pricing Basis.....	247
7.1.3	Cost of Production Basis	249
7.2	Economic Analysis of Thermal Conversion Technologies	250
7.2.1	Production Cost Estimates of Pyrolysis Products	250
7.2.2	Production Cost Estimates of Hydrothermal Treatment Products	253
7.3	Economic Analysis of Olefins Production.....	256
7.3.1	Production Cost Estimates of Olefins from Pyrolysis Products	256
7.3.2	Production Cost Estimates of Olefins from Hydrothermal Cracking Products	260
7.3.3	Carbon Capture and Sequestration	264
7.4	Conclusions.....	268
7.4.1	Ethylene ROCE Analysis	268
7.4.2	Margin Overview	269
8	Competitiveness	270
8.1	Regional Competitiveness Analysis	270
8.1.1	Plant Scale Competitiveness in Thermal Conversion Plants	270
8.1.2	Recycled Content Feedstock Competitiveness in Olefin Production	272
8.2	Plastic-based Naphtha Cost Competitiveness	276
8.2.1	Naphtha Overview	276
8.2.2	Cost Structure and Assumptions.....	277
8.2.3	Delivered Cost Assumptions	281
8.2.4	Tariffs	282
8.2.5	Delivered Cost Competitiveness	283

9	Carbon Intensity Analysis	285
9.1	Introduction	285
9.2	Methodology	285
9.2.1	Generic Nature of the Analysis	285
9.2.2	Carbon Intensity Methodology	285
9.3	Results	290
10	Strategic and Business Considerations	293
10.1	Introduction	293
10.2	Recycling Limitations	293
10.2.1	Behavioral Limitations	294
10.2.2	Economic Limitations	294
10.2.3	Financial Limitations	294
10.2.4	Systemic Limitations	295
10.2.5	Conclusions	295
10.3	Recycling System Requirements	295
10.3.1	Type of Waste	297
10.3.2	Collection and Sorting	298
10.4	Thermal Conversion Technologies Profitability	299
10.4.1	Current Analysis	299
10.4.2	Crude Oil Price Environment Effect on Thermal Conversion Profitability	300
10.5	Mass Balance Approach	307
10.6	New Applications of Recycled Materials Derived from Plastic Waste	309
10.7	Potential Applications for Thermal Conversion Technologies	309
10.8	SWOT Analysis	310

Appendices

A	Thermal Conversion Products and Petrochemical Cost of Production Estimates	312
B	References	332

Table 83	Cost of Production Estimate for: Hydrothermal-based Naphtha Process: Hydrothermal Treatment of Mixed Plastics Waste; USGC Basis	317
Table 84	Cost of Production Estimate for: Hydrothermal-based Naphtha Process: Hydrothermal Treatment of Mixed Plastics Waste; Western Europe Basis	318
Table 85	Cost of Production Estimate for: Hydrothermal-based Naphtha Process: Hydrothermal Treatment of Mixed Plastics Waste; China Basis	319
Table 86	Cost of Production Estimate for: Hydrothermal-based Naphtha Process: Hydrothermal Treatment of Mixed Plastics Waste; Japan Basis	320
Table 87	Cost of Production Estimate for: Hydrothermal-based Naphtha Process: Hydrothermal Treatment of Mixed Plastics Waste; Southeast Asia Basis	321
Table 88	Cost of Production Estimate for: Ethylene Process: Steam Cracking of Pyrolysis-based Naphtha and Fossil-based Naphtha (Moderate Severity); USGC Basis	322
Table 89	Cost of Production Estimate for: Ethylene Process: Steam Cracking of Pyrolysis-based Naphtha and Fossil-based Naphtha (Moderate Severity); Western Europe Basis	323
Table 90	Cost of Production Estimate for: Ethylene Process: Steam Cracking of Pyrolysis-based Naphtha and Fossil-based Naphtha (Moderate Severity); China Basis	324
Table 91	Cost of Production Estimate for: Ethylene Process: Steam Cracking of Pyrolysis-based Naphtha and Fossil-based Naphtha (Moderate Severity); Japan Basis	325
Table 92	Cost of Production Estimate for: Ethylene Process: Steam Cracking of Pyrolysis-based Naphtha and Fossil-based Naphtha (Moderate Severity); Southeast Asia Basis	326
Table 93	Cost of Production Estimate for: Ethylene Process: Steam Cracking of hydrothermal-based-Naphtha and Fossil-based Naphtha (Moderate Severity); USGC Basis	327
Table 94	Cost of Production Estimate for: Ethylene Process: Steam Cracking of hydrothermal-based-Naphtha and Fossil-based Naphtha (Moderate Severity); Western Europe Basis	328
Table 95	Cost of Production Estimate for: Ethylene Process: Steam Cracking of hydrothermal-based-Naphtha and Fossil-based Naphtha (Moderate Severity); China Basis	329
Table 96	Cost of Production Estimate for: Ethylene Process: Steam Cracking of hydrothermal-based-Naphtha and Fossil-based Naphtha (Moderate Severity); Japan Basis	330
Table 97	Cost of Production Estimate for: Ethylene Process: Steam Cracking of hydrothermal-based-Naphtha and Fossil-based Naphtha (Moderate Severity); Southeast Asia Basis	331

SPECIAL REPORTS

The NexantECA Subscriptions' program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. reports are available as a subscription program or on a single report basis.

Contact Details:

Americas:

Marcos Nogueira Cesar, Vice President, Global Subscriptions and Reports

Phone: + 1-914-609-0324, e-mail: mcesar@NexantECA.com

Erica Hill, Client Services Coordinator, Subscriptions and Reports

Phone: + 1-914-609-0386, e-mail: ehill@NexantECA.com

EMEA:

Anna Ibbotson, Vice President, Sales and Marketing

Phone: +44-207-950-1528, aibbotson@NexantECA.com

Asia:

Chommanad Thammanayakatip, Managing Consultant

Phone: +66-2793-4606, email: chommanadt@NexantECA.com

NexantECA Subscriptions and Reports provide clients with comprehensive analytics, forecasts and insights for the chemicals, polymers, energy and cleantech industries. Using a combination of business and technical expertise, with deep and broad understanding of markets, technologies and economics, NexantECA provides solutions that our clients have relied upon for over 50 years.
