

**TECHNOLOGY & COSTS****Biorenewable Insights****Bio-Polyols for Polymers**

## Table of Contents

A Report by **NexantECA**, the Energy and Chemical Advisory company

Published Date: October 2023

[www.nexanteca.com/subscriptions-and-reports](http://www.nexanteca.com/subscriptions-and-reports)**Contents**

1	Executive Summary .....	1
1.1	Technology .....	2
1.1.1	Polyols .....	2
1.2	Economics .....	3
1.2.1	Polyols .....	3
1.3	Capacity Analysis .....	6
1.3.1	Polyols .....	6
1.3.2	Recent developments in Bio-polyol Capacity .....	6
1.4	Implications for the Conventional Technology .....	6
2	Introduction .....	7
2.1	Introduction to Polyols and Polyurethanes .....	7
2.2	Bio-polyols Overview .....	8
2.3	Business Overview .....	10
2.3.1	Polyol Value Chain .....	10
2.3.2	Polyol End-use Markets .....	11
2.3.3	Market Drivers .....	13
2.3.4	Market Constraints .....	13
2.4	Sustainable Polyol Strategies .....	14
2.4.1	Mass-Balance Approach .....	14
2.4.2	Drop-in Approach .....	14
2.4.3	Carbon Dioxide as Feedstock .....	14
2.4.4	Chemical Recycling .....	15
2.5	Historical Development .....	16
3	Technology .....	18
3.1	Conventional Technologies .....	18
3.1.1	Conventional Polyether Polyol Technology .....	18
3.1.2	Conventional Polyester Polyol Technology .....	29
3.2	Bio-polyol Technology .....	35
3.2.1	Natural Oil Polyols (NOPs) .....	35

	3.2.2	Aromatic Bio-polyols.....	36
	3.2.3	Technology Players.....	38
4		Economics.....	45
	4.1	Economic Methodology.....	45
	4.1.1	Sources.....	45
	4.1.2	Capital Cost Elements.....	45
	4.1.3	Operating Cost Elements.....	49
	4.2	Cases Modeled.....	52
	4.3	Comparative Economics.....	92
	4.4	Comparison by Region and Process.....	92
5		Capacity Analysis.....	99
	5.1	Bio-Polyols.....	99
	5.1.1	Recent Developments.....	100
	5.1.2	BASF.....	100
	5.1.3	DowDuPont.....	100
	5.1.4	Oleon.....	100
	5.1.5	Cargill (previously Bio-based Technologies / Urethane Soy Systems).....	100
	5.1.6	Emery Oleochemicals.....	101
	5.1.7	Alberdingk Boley.....	101
	5.1.8	Eagle Specialty Products.....	102
	5.1.9	Hokuko.....	102
	5.1.10	Itoh oil chemicals.....	102
	5.1.11	Stahl (previously Elevance Renewable Sciences)().....	102
	5.1.12	Vertellus.....	102
	5.1.13	Stepan Company.....	102
	5.1.14	Covestro (previously Bayer Material Science).....	102
	5.1.15	Huntsman IFS.....	103
	5.1.16	Lubrizol.....	103
	5.1.17	PolyLabs.....	103
	5.1.18	Vithal Polyols Pvt. Ltd.....	103
	5.1.19	Changchun Dacheng BioChemical Development Company.....	104
	5.1.20	Feighang Industry.....	104
	5.1.21	Hairma Group.....	104
	5.1.22	Cardolite Corporation.....	104
	5.1.23	Elmira Industrial Supplies.....	104
	5.1.24	Palmer.....	104
6		Implications for the Conventional Technology.....	105
<b>Appendices</b>			
A		References.....	106

**Figures**

Figure 1	General Chemistry of Polyurethanes.....	1
Figure 2	Summary of Polyol Costs of Production .....	5
Figure 3	General Chemistry of Polyurethanes.....	7
Figure 4	Polyol Value Chain .....	10
Figure 5	Comparison of the Relationship between Raw Material Suppliers and Processors .....	11
Figure 6	Overview of Preferred Raw Materials for Polyurethanes .....	12
Figure 7	Emery Oleochemicals INFIGREEN Process .....	15
Figure 8	Timeline of Polyurethane Developments.....	16
Figure 9	Polyol Production via Batch Processing.....	21
Figure 10	Polyester Polyol Production via Esterification .....	32
Figure 11	Polyester Polyol Production via Transesterification .....	34
Figure 12	Natural Oil Polyol (NOP) from Castor.....	36
Figure 13	Synthesis of Aromatic Bio-polyols from Lignin .....	37
Figure 14	Synthesis of Mannich Polyols from Cashew Nutshell Liquid (CSNL).....	38
Figure 15	Emery Oleochemicals EMEROX Ozonolysis Process .....	41
Figure 16	Self-condensation of Diols into Polyether Polyols through POLYKEY Technology .....	43
Figure 17	Summary of Polyol Costs of Production .....	93
Figure 18	Costs of Production Summary, Polyester Polyols - USGC .....	94
Figure 19	Costs of Production Summary - China .....	96
Figure 20	Costs of Production Summary - Brazil.....	97
Figure 21	Costs of Production Summary - Western Europe .....	98

**Tables**

Table 1	Potential Bio-based Alternatives to Polyol Ingredients.....	9
Table 2	Typical Specifications for a 2,000 MW Poly(oxypropylene) Glycol .....	23
Table 3	Properties of Commonly used Starters for the Production of Polyurethane Polyols .....	24
Table 4	Typical Properties of Glycerin-PO adduct with MW of 2,900 to 3,300 .....	26
Table 5	Important Diols and Triols Used for Polyester Polyols .....	29
Table 6	Important Dicarboxylic Acids and Derivatives Used for Polyester Polyols.....	29
Table 7	Trifunctional Polyether Polyol (3,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide, USGC.....	55
Table 8	Trifunctional Polyether Polyol (3,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide, China.....	56
Table 9	Trifunctional Polyether Polyol (3,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide, Brazil .....	57
Table 10	Trifunctional Polyether Polyol (3,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide, Western Europe .....	58
Table 11	Trifunctional Polyether Polyol (5,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide and Ethylene Oxide (95:5), USGC.....	59
Table 12	Trifunctional Polyether Polyol (5,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide and Ethylene Oxide (95:5), China.....	60
Table 13	Trifunctional Polyether Polyol (5,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide and Ethylene Oxide (95:5), Brazil .....	61
Table 14	Trifunctional Polyether Polyol (5,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide and Ethylene Oxide (95:5), Western Europe.....	62
Table 15	Trifunctional Polyether Polyol (5,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide and Ethylene Oxide (80:20), USGC.....	63
Table 16	Trifunctional Polyether Polyol (5,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide and Ethylene Oxide (80:20), China.....	64
Table 17	Trifunctional Polyether Polyol (5,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide and Ethylene Oxide (80:20), Brazil .....	65
Table 18	Trifunctional Polyether Polyol (5,000 MW) via Alkoxylation of Glycerin Starter with Propylene Oxide and Ethylene Oxide (80:20), Western Europe.....	66
Table 19	Higher-Functionality Polyether Polyol via Alkoxylation of Sorbitol Starter with Propylene Oxide, USGC.....	67
Table 20	Higher-Functionality Polyether Polyol via Alkoxylation of Sorbitol Starter with Propylene Oxide, China.....	68
Table 21	Higher-Functionality Polyether Polyol via Alkoxylation of Sorbitol Starter with Propylene Oxide, Brazil .....	69
Table 22	Higher-Functionality Polyether Polyol via Alkoxylation of Sorbitol Starter with Propylene Oxide, Western Europe .....	70
Table 23	Higher-Functionality Polyether Polyol via Alkoxylation of Sucrose Starter with Propylene Oxide, USGC.....	71
Table 24	Higher-Functionality Polyether Polyol via Alkoxylation of Sucrose Starter with Propylene Oxide, China.....	72
Table 25	Higher-Functionality Polyether Polyol via Alkoxylation of Sucrose Starter with Propylene Oxide, Brazil .....	73

Table 26	Higher-Functionality Polyether Polyol via Alkoxylation of Sucrose Starter with Propylene Oxide, Western Europe .....	74
Table 27	Higher-Functionality Polyether Polyol via Alkoxylation of Soybean Oil Starter with Propylene Oxide, USGC .....	75
Table 28	Higher-Functionality Polyether Polyol via Alkoxylation of Soybean Oil Starter with Propylene Oxide, China .....	76
Table 29	Higher-Functionality Polyether Polyol via Alkoxylation of Soybean Oil Starter with Propylene Oxide, Brazil .....	77
Table 30	Higher-Functionality Polyether Polyol via Alkoxylation of Soybean Oil Starter with Propylene Oxide, Western Europe .....	78
Table 31	Polyether Polyol via Ring Opening of Epoxidized Soybean Oil with Hydrogen Peroxide and Acetic Acid, USGC .....	80
Table 32	Polyether Polyol via Ring Opening of Epoxidized Soybean Oil with Hydrogen Peroxide and Acetic Acid, China .....	81
Table 33	Polyether Polyol via Ring Opening of Epoxidized Soybean Oil with Hydrogen Peroxide and Acetic Acid, Brazil .....	82
Table 34	Polyether Polyol via Ring Opening of Epoxidized Soybean Oil with Hydrogen Peroxide and Acetic Acid, Western Europe .....	83
Table 35	Polyester Polyol via Melt-Condensation Esterification of Adipic Acid with 1,4-Butanediol, USGC .....	84
Table 36	Polyester Polyol via Melt-Condensation Esterification of Adipic Acid with 1,4-Butanediol, China .....	85
Table 37	Polyester Polyol via Melt-Condensation Esterification of Adipic Acid with 1,4-Butanediol, Brazil .....	86
Table 38	Polyester Polyol via Melt-Condensation Esterification of Adipic Acid with 1,4-Butanediol, Western Europe .....	87
Table 39	Polyester Polyol via Polycondensation Esterification of Succinic Acid with Diethylene Glycol, USGC .....	88
Table 40	Polyester Polyol via Polycondensation Esterification of Succinic Acid with Diethylene Glycol, China .....	89
Table 41	Polyester Polyol via Polycondensation Esterification of Succinic Acid with Diethylene Glycol, Brazil .....	90
Table 42	Polyester Polyol via Polycondensation Esterification of Succinic Acid with Diethylene Glycol, Western Europe .....	91
Table 43	Costs of Production Summary - USGC .....	95
Table 44	Costs of Production Summary - China .....	96
Table 45	Costs of Production Summary - Brazil .....	97
Table 46	Costs of Production Summary .....	98
Table 47	Main Natural Oil Polyol (NOP) Producers in 2023 and the Family of Products in Their Catalogs .....	99
Table 48	Cashew Nutshell Liquid (CNSL)-Based Polyols Available on the Market in 2023 .....	99

## TECHNOLOGY & COSTS

# Biorenewable Insights

The NexantECA Subscriptions' Biorenewable Insights program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. Biorenewable Insights reports are available as a subscription program or on a single report basis.

### Contact Details:

#### Americas:

Steven Slome, Principal, Biorenewable Insights

Phone: + 1-914-609-0379, e-mail: [sslome@NexantECA.com](mailto:sslome@NexantECA.com)

Erica Hill, Client Services Coordinator, Subscriptions and Reports

Phone: + 1-914-609-0386, e-mail: [ehill@NexantECA.com](mailto:ehill@NexantECA.com)

#### EMEA:

Anna Ibbotson, Vice President, Sales and Marketing

Phone: +44-207-950-1528, [aibbotson@NexantECA.com](mailto:aibbotson@NexantECA.com)

#### Asia:

Chommanad Thammanayakatip, Managing Consultant

Phone: +66-2793-4606, email: [chommanadt@NexantECA.com](mailto:chommanadt@NexantECA.com)

NexantECA Subscriptions and Reports provide clients with comprehensive analytics, forecasts and insights for the chemicals, polymers, energy and cleantech industries. Using a combination of business and technical expertise, with deep and broad understanding of markets, technologies and economics, NexantECA provides solutions that our clients have relied upon for over 50 years.
