1	Executive Summary	1
1.1	Introduction.....	1
1.2	Technology Overview and Analysis	2
1.2.1	Steam Cracking Technologies	2
1.2.2	Non-Steam Cracking Technologies	4
1.3	Low or Net Zero Emission Technologies	5
1.4	Sustainable Olefin Technologies.....	6
1.5	Technology Readiness Level Comparison.....	7
1.6	Global Capacity and Cash Cost Curve Analysis.....	8
1.7	Process Economics.....	11
1.7.1	Carbon Capture.....	11
1.7.2	Changing Dynamics of Ethane, Propane, and Naphtha Crackers.....	13
1.8	Carbon Intensity and Production Economics	14
2	Introduction.....	20
2.1	Ethylene Production Pathways	21
2.2	Business Developments.....	22
2.3	Sustainability Agenda.....	24
2.4	Technology Holders and Licensors.....	25
2.4.1	Steam Cracking Technology Licensors.....	25
2.4.2	Non-Steam Cracking Technology Licensors.....	27
2.5	Specifications	28
2.6	Health Hazards.....	28
2.7	Storage and Transportation.....	29
3	Conventional Olefin Technologies	30
3.1	Steam Cracking of Hydrocarbons	30
3.1.1	Chemistry and Process Overview	30
3.1.2	Steam Cracker Feedstocks	35
3.1.3	Process Variables	35
3.1.4	Hot End Process	40

3.1.5	Cold End Process.....	53
3.1.6	Design Trends	66
3.2	Steam Cracker Technology Licensors	67
3.2.1	KBR	67
3.2.2	Linde.....	69
3.2.3	Lummus Technology	76
3.2.4	Technip Energies	78
3.3	Coal-based Methanol-to-Olefins (CMTO)	82
3.3.1	Process Overview	82
3.3.2	Honeywell UOP Advanced MTO.....	86
4	Low or Net Zero Emission Technologies	94
4.1	Recovery and Hydrogen Utilization (H ₂ -crackers).....	94
4.1.1	Challenges of Hydrogen Combustion	95
4.1.2	Status and Announcements	95
4.1.3	Technology Developments.....	97
4.1.4	Discussion	107
4.2	Carbon Capture and Storage (CCS)	109
4.2.1	Chemistry and Process Overview	109
4.2.2	Recent Announcements	112
4.3	Electrification of Crackers (E-crackers).....	112
4.3.1	Electric Heating Technologies.....	112
4.3.2	Status and Announcements	115
4.3.3	Technology Developments.....	116
4.3.4	Discussion	124
4.4	Turbomachinery-based or Rotary Type Chemical Reactors (Rotary CR)	128
4.4.1	Operating Principles and Process Overview.....	128
4.4.2	Status and Announcements	129
4.4.3	Technology Developments.....	130
4.4.4	Discussion	134
5	Sustainable Olefin Technologies and Other Developments	136
5.1	Crude Oil to Chemical (COTC) Plants	136
5.1.1	Advantages, Process Overview, and Challenges	137
5.1.2	Status and Announcements	137
5.1.3	Technology Developments.....	138
5.1.4	Discussion	141
5.2	Oxidative Coupling of Methane (OCM)	141
5.2.1	Chemistry and Process Overview	141
5.2.2	Status and Announcements	142
5.2.3	Technology Developments.....	142
5.2.4	Discussion	146
5.3	Ethane Dehydrogenation.....	146
5.3.1	Status and Technology Developments	147

5.4	Membrane Separation of Olefins/Paraffins (MSOP)	149
5.4.1	Chemistry Overview	149
5.4.2	Membrane Materials and Separation Mechanisms.....	150
5.4.3	Technology Licensors	152
5.4.4	Discussion	153
5.5	Other Developments	153
5.5.1	Honeywell UOP Integrated Olefin Suite	153
5.5.2	Renewable Naphtha.....	155
5.5.3	Bioethanol-to-Ethylene	156
5.5.4	Biomass-based Methanol-to-Olefins	158
5.5.5	Biomass-based Fischer-Tropsch-to-Olefins.....	159
5.5.6	Electrochemical Production of Ethylene.....	160
5.5.7	Dry Reforming of Methane with Carbon Dioxide.....	162
6	Technology Readiness Level Comparison.....	163
7	Global Capacity and Cost Curve Analysis	165
7.1	Capacity.....	165
7.1.1	Global	165
7.1.2	North America	165
7.1.3	South America	168
7.1.4	Western Europe	169
7.1.5	Central Europe	171
7.1.6	Eastern Europe	172
7.1.7	Middle East.....	173
7.1.8	Africa	175
7.1.9	China	176
7.1.10	Asia Pacific (ex. China)	179
7.2	Cost Curve Analysis	181
8	Process Economics	183
8.1	Costing Basis	183
8.1.1	Investment Basis	183
8.1.2	Pricing Basis.....	185
8.1.3	Cost of Production Basis	187
8.2	Cost of Production Analysis	189
8.2.1	Middle East.....	189
8.2.2	United States.....	198
8.2.3	Western Europe	207
8.2.4	China	215
8.3	Regional Comparisons	225
8.3.1	Ethane Cracker	225
8.3.2	Ethane/Propane Cracker.....	226
8.3.3	Propane Cracker	227
8.3.4	Mixed Feed Cracker	228

8.3.5	Naphtha Cracker	229
8.3.6	Atmospheric Gas Oil	230
8.3.7	Methanol-to-Olefins	231
8.4	Steam Cracking Decarbonization via Carbon Capture and Storage	232
8.4.1	Ethane Crackers with Carbon Capture and Storage.....	232
8.4.2	Naphtha Crackers with Carbon Capture and Storage	238
8.5	Changing Dynamics of Ethane, Propane and Naphtha Crackers.....	243
8.6	Changing Dynamics of Coal-based and Merchant Methanol-based MTO Plants in China	245
9	Commercial Applications.....	246
9.1.1	Existing Commercial Applications	246
9.1.2	New and Emerging Commercial Applications	248
10	Carbon Intensity Analysis.....	249
10.1	Carbon Intensity Accounting Methodology.....	249
10.2	Carbon Intensities of Steam Crackers and Methanol-to-Olefins Process.....	251
10.3	Carbon Intensity and Production Economics	254
10.4	Breakeven Carbon Costs	255

Appendices

A	Definitions of Capital Cost Terms Used in Process Economics.....	258
B	Definitions of Operating Cost Terms Used in Process Economics	263
C	TECH Program Title Index (2013-2023)	266
D	References	269

TECHNOLOGY & COSTS

Technoeconomics - Energy & Chemicals (TECH)

The NexantECA Subscriptions' Technoeconomics - Energy & Chemicals (TECH) program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. Technoeconomics - Energy & Chemicals (TECH) reports are available as a subscription program or on a single report basis.

Asia:

Chommanad Thammanayakatip, Managing Consultant

Phone: +66-2793-4606, email: chommanadt@NexantECA.com

NexantECA Subscriptions and Reports provide clients with comprehensive analytics, forecasts and insights for the chemicals, polymers, energy and cleantech industries. Using a combination of business and technical expertise, with deep and broad understanding of markets, technologies and economics, NexantECA provides solutions that our clients have relied upon for over 50 years.
