

Membrane Processes for Gas Purification

92S4

August 1994

	Page
I SUMMARY	1
A. INTRODUCTION	1
B. TECHNOLOGY	3
1. Fundamentals	3
2. Fabrication	4
3. Technological Development	5
C. ECONOMIC ANALYSIS	6
1. Introduction	6
2. Nitrogen	7
3. Hydrogen	12
D. COMMERCIAL ANALYSIS	15
1. Applications	15
2. Participants	15
3. Nitrogen	16
4. Hydrogen	18
 II INTRODUCTION	 21
 III TECHNOLOGY	 24
A. FUNDAMENTALS	24
1. Background	24
2. Theory	24
3. Characterization	27
4. Performance	28
(a) Effect of Inlet and Outlet Conditions	28
(b) Effect of Selectivity and Permeability	29
(c) Effect of Pressure	29

TABLE OF CONTENTS
(Continued)

	Page
(d) Air Separation Permeabilities	29
5. Materials	31
6. Membrane Types	33
(a) Asymmetric Membranes	33
(b) Composite Membranes	33
6. Module Configuration	33
B. FABRICATION	37
1. Background	37
2. Manufacturing Processes	37
(a) Solution Spinning	37
(b) Melt Spinning	38
3. Commercial HF Membrane Modules	41
C. TECHNOLOGICAL DEVELOPMENT	44
1. Historical Perspective	44
2. Current Trends	46
(a) Membrane Design Innovations	47
(1) Ultrathin Barrier Layers	47
(2) Defect Elimination	47
(b) Process Design Innovations	48
(1) Counter Current Operation	48
(2) Contaminant Control	48
(3) Multistaging	48
(4) Hybrid Processes	48
(5) Process Control for Turndown Efficiency	49
3. Future Directions	49

TABLE OF CONTENTS
(Continued)

	Page
(a) Production of Ultrathin Membranes	49
(b) Highly Oxygen Selective Membranes	49
(c) Inorganic Membrane Materials	50
IV ECONOMIC ANALYSIS	51
A. INTRODUCTION	51
B. NITROGEN GAS	52
1. Process Description	52
(a) Cryogenic	52
(b) Pressure Swing Adsorption (PSA)	54
(c) Membrane Systems	54
2. Economic Assumptions	55
3. Comparative Economics	56
C. HYDROGEN RECOVERY - REFINERY APPLICATIONS	67
1. Overview of Potential Areas for Hydrogen Recovery	67
2. Process Descriptions	68
(a) High-Pressure Hydrocracking	68
(b) Hydrogen Recovery via Membrane Systems	71
(c) Hydrogen Production via Steam Methane Reforming	73
3. Comparative Economics	74
V COMMERCIAL ANALYSIS	79
A. APPLICATIONS	79
1. Air Separation	79
2. Hydrogen Recovery	80

TABLE OF CONTENTS
(Continued)

	Page
3. Acid Gas Removal	80
B. PARTICIPANTS	81
C. MARKETS	82
1. Nitrogen	82
(a) Distribution	82
(b) Demand	83
(c) Supply	84
2. Hydrogen Recovery	86
