

Unsaturated Polyesters

94/95S7

November 1996

TABLE OF CONTENTS

	Page
I SUMMARY	1
A. UNSATURATED POLYESTER AND VINYL ESTER CHEMISTRY	1
1. Conventional Unsaturated Polyesters	1
2. Dicyclopentadiene Based UPR Resins	3
3. Vinyl Ester Resins	3
B. RESIN FEEDSTOCKS AND CROSSLINKING AGENTS	4
C. UPR APPLICATION PROPERTIES	6
D. RESIN MANUFACTURING	9
E. ECONOMIC COMPARISON OF PAN AND DCPD BASED UPR RESINS	11
F. COMMERCIAL ISSUES	13
1. United States and Canada	13
2. Western Europe	17
3. Asia/Pacific Rim/Rest of World	19
 II INTRODUCTION	 21
A. OVERVIEW	21
1. Historical Perspective	21
2. Fabrication of Products	22
3. Markets	23
 III UNSATURATED POLYESTER AND VINYL ESTER TECHNOLOGY	 26
A. CHEMISTRY	26
1. Introduction	26
2. Resin Families	26
(a) Conventional Unsaturated Polyesters	26
(1) Orthophthalic Based Resins	28
(2) Isophthalic Based Resins	29
(b) DCPD Based Resins	29
(c) Vinyl Esters	30

TABLE OF CONTENTS

(Continued)

	Page
B. RESIN FEEDSTOCKS AND CROSSLINKING AGENTS	31
1. Summary of Major Ingredients	31
2. Unsaturated Dicarboxylic Acids	32
3. Saturated Dicarboxylic Acids	32
(a) Phthalic Anhydride (PAN)	32
(b) Isophthalic Acid (IPA)	32
(c) Cyclopentadiene-Maleate Ester Adducts	33
(d) Adipic Acid	33
(e) Chlorendic Anhydride	33
(f) Terephthalic Acid (TPA)	33
(g) Tetrahydrophthalic Anhydride	33
4. Glycols (Diols)	34
(a) Propylene Glycol (1,2-Propanediol)	34
(b) Ethylene Glycol	34
(c) Diethylene Glycol and Dipropylene Glycol	34
(d) Neopentyl Glycol (2,2-Dimethyl-1,3-Propanediol)	34
(e) 1,4-Butanediol (Butylene Glycol)	35
(f) Dibromoneopentyl Glycol	35
(g) Bisphenol A (BPA)	35
(h) 2-Methyl-1,3-Propanediol	35
5. Unsaturated Monomers (Vinyl, Allyl, and Acrylic)	35
(a) Styrene	35
(b) Vinyl Toluene	36
(c) Methyl Methacrylate	36
(d) Diallyl Phthalate	36
(e) α -Methylstyrene	36
(f) Triallyl Cyanurate	36
(g) Divinyl Benzene	36

TABLE OF CONTENTS

(Continued)

	Page
IV UPR APPLICATION PROPERTIES AND FABRICATION TECHNIQUES	37
A. OVERVIEW	37
B. EFFECTS OF FEEDSTOCK CHOICE ON MECHANICAL PROPERTIES OF RESINS PRODUCED	39
1. Tensile and Flexural Properties	39
2. Impact Resistance	41
3. Hardness	41
4. Heat Distortion Temperature (HDT)	42
5. Chemical Resistance	43
6. Water Absorption	44
7. Weatherability	45
8. Flame Retardancy	45
C. EFFECT OF FABRICATION TECHNIQUE ON PRODUCT PROPERTIES	46
1. General	46
2. Factors Relating to the Reinforcing System	46
(a) Amount of Reinforcement	46
(b) Fiber Length	47
(c) Surface Characteristics	47
(d) Fiber Orientation	47
(e) Degree of "Wet Out"	48
(f) Factors Relating to the Resin	48
D. PRODUCT LIFE CYCLE AND OTHER ENVIRONMENTAL CONSIDERATIONS	49
E. UPR AND VE FABRICATION TECHNIQUES	50
1. Overview	50
2. History	50
3. Description of Techniques	51
(a) Contact Molding	52
(1) Hand Layup	52
(2) Sprayup	53

TABLE OF CONTENTS

(Continued)

	Page
(b) Matched Die Molding	55
(1) Introduction	55
(2) Mat or Preform Molding	57
(3) Sheet Molding Compound	57
(4) Bulk Molding Compound	58
(5) Premix Molding	60
(6) Injection Molding	60
(c) Pultrusion	63
(d) Centrifugal Casting	63
(e) Filament Winding	65
(f) Casting and Laminating	66
(1) General	66
(2) Casting	68
(3) Laminating	69
V UPR PRODUCTION ECONOMICS	72
A. RESIN MANUFACTURING	72
1. Single Step Esterification	72
2. Two Step Esterification	74
3. DCPD Esterification Process	74
4. Scrap PET Feed	75
5. Vinyl Ester Production	75
B. COST COMPARISON OF PAN AND DCPD BASED UPR RESINS	76
C. DETAILED COST OF PRODUCTION ANALYSIS OF UPR FEEDSTOCKS	 81
VI GLOBAL BUSINESS PERSPECTIVE	92
A. UNITED STATES AND CANADA	92
1. Overview	92
2. UPR Demand	95
3. UPR Capacity and Industry Structure	98

TABLE OF CONTENTS

(Continued)

	Page
4. Use of Alternative Feedstocks	100
5. Raw Material Supply	101
B. WESTERN EUROPE	104
1. Overview	104
2. UPR Demand	104
3. UPR Production and Industry Structure	105
4. Use of Alternative Feedstocks	108
C. ASIA/PACIFIC RIM/REST OF WORLD	110
1. Overview	110
2. Asia	111
3. South America	111
PERP TITLE INDEX	114

TABLES

		Page
Table I.B.1	Feedstocks and Other Chemicals Used in UPR and VE Production	5
Table I.C.1	Typical Physical Property Balance of Propylene Glycol/Maleic Anhydride/Phthalic Anhydride Polyester	8
Table I.E.1	Illustrative Cost Comparison of PAN versus DCPD Based UPR Resins	12
Table I.F.1	U.S. Unsaturated Polyester Demand, 1992-2005	16
Table I.F.2	West European Unsaturated Polyester Resin Demand, 1992-2005	18
Table III.B.1	Feedstocks and Other Chemicals Used in UPR and VE Production	31
Table IV.B.1	Typical Physical Property Balance of Propylene Glycol/Maleic Anhydride/Phthalic Anhydride/Polyester	40
Table V.B.1	Illustrative Cost Comparison of PAN versus DCPD Based UPR Resins, Feedstocks Valued at Cash Cost	78
Table V.B.2	Illustrative Cost Comparison of PAN versus DCPD Based UPR Resins, Feedstocks Valued at Production Cost plus 10% ROI	79
Table V.B.3	Illustrative Cost Comparison of PAN versus DCPD Based UPR Resins, Feedstocks Valued at List Price	80
Table V.C.1	Cost Estimate of Styrene Production via Zeolite Alkylation/Dehydrogenation	82
Table V.C.2	Cost Estimate of Maleic Anhydride Production via Fluid Bed/Solvent Recovery from Butane	83
Table V.C.3	Cost Estimate of Phthalic Anhydride Production via Vapor Phase Oxidation	84
Table V.C.4	Cost Estimate of Isophthalic Acid Production via <i>meta</i> -Xylene Oxidation	85
Table V.C.5	Cost Estimate of Propylene Glycol Production via Chlorohydrin without Chlor-Alkali; Hydration	86
Table V.C.6	Cost Estimate of Ethylene Glycol Production via Shell's Process	87

TABLES (Continued)

	Page
Table V.C.7 Cost Estimate of Dicyclopentadiene (94%) Production via Soaking/Rerun/Cracking/Dimerization	88
Table V.C.8 Cost Estimate of Methacrylic Acid Production via Isobutylene Oxidation	89
Table V.C.9 Cost Estimate of Diglycidyl Ether of Bisphenol A Production via Bisphenol A plus Epichlorohydrin	90
Table V.C.10 Cost Estimate of Neopentyl Glycol Production via Eastman Chemical Process	91
Table VI.A.1 U.S. Unsaturated Polyester Resin Demand, 1992-2005	96
Table VI.A.2 U.S. Unsaturated Polyester Resin Supply/Demand Balance, 1992-2005	97
Table VI.A.3 U.S. UPR Capacity, 1995	99
Table VI.A.4 North American DCPD Capacity, 1995	103
Table VI.B.1 West European Unsaturated Polyester Resin Consumption by End Use, 1995	105
Table VI.B.2 West European Unsaturated Polyester Resin Demand, 1990-2005	106
Table VI.B.3 West European Unsaturated Polyester Resin Capacity, 1995	107-108
Table VI.B.4 West European DCPD Capacity, 1995	109
Table VI.C.1 Asian Unsaturated Polyester Resin Capacity by Producer, 1995	111-113
