This Report was prepared by Nexant, Inc. ("Nexant") and is part of ChemSystems Process Evaluation/Research Planning (PERP) Program. Except where specifically stated otherwise in this Report, the information contained herein is prepared on the basis of information that is publicly available, and contains no confidential third party technical information to the best knowledge of Nexant. The aforesaid information has not been independently verified or otherwise examined to determine its accuracy, completeness, or feasibility.

Neither Nexant, Subscriber, nor any person acting on behalf of either assumes any liabilities with respect to the use of, or for damages resulting from the use of, any information contained in this Report. Nexant does not represent or warrant that any assumed conditions will come to pass.

The Report is submitted on the understanding that the Subscriber will maintain the contents confidential except for the Subscriber's internal use. The Report shall not be reproduced, distributed, or used outside Subscriber's organization without first obtaining prior written consent by Nexant. Each Subscriber agrees to use reasonable effort to protect the confidential nature of the Report.

Contents

Section	Page
1 Summary	1
1.1 BACKGROUND ON THERMOPLASTIC WOOD COMPOSITES	1
1.2 THE THERMOPLASTIC WOOD COMPOSITE INDUSTRY	2
1.3 MATERIALS.....	6
1.4 PROCESS DESIGN.....	8
1.5 ECONOMICS	10
1.6 REGIONAL ANALYSIS	12
1.6.1 North America	12
1.6.2 Western Europe.....	13
1.6.3 China	14
2 Introduction	16
2.1 BACKGROUND ON THERMOPLASTIC WOOD COMPOSITES	16
2.2 THE THERMOPLASTIC WOOD COMPOSITE INDUSTRY	17
3 Technology	21
3.1 CHEMISTRY	21
3.1.1 Resin Properties	21
3.1.2 Natural Component Properties.....	25
3.1.3 Additives	28
3.2 PROCESS DESIGN.....	30
3.3 TRENDS IN TECHNOLOGY	39
4 Economics	40
4.1 BASIS	40
4.2 INVESTMENT	41
4.3 ECONOMICS	42
4.4 RAW MATERIAL SENSITIVITY	49
5 Commercial Analysis	51
5.1 END USES.....	51
5.1.1 Outdoor Applications.....	51
5.1.2 Automotive Industrial Applications.....	53

5.1.3	Applications in Building and Construction.....	53
5.1.4	Interiors/Internal Finishes	53
5.1.5	Structural Load-Bearing Applications	53
5.2	REGIONAL ANALYSIS	54
5.2.1	North America	54
5.2.2	Western Europe.....	58
5.2.3	China	61
6	References	65
7	Glossary	66
Appendix		Page
A	Nexant’s ChemSystems Capital Cost Estimates	A-1
B	PERP Program Title Index	B-1

Figure	Page
1.1 Thermoplastic Wood Composites.....	2
1.2 Example of a Deck Built with WPCs	3
1.3 North American Wood Plastic Composite Resin Use, 2006	6
1.4 “Conical” Twin-Screw Design	8
1.5 Cost Comparison of PE Wood Composites and PVC Wood Composites.....	11
1.6 North American Wood Plastic Composite Demand by End Use, 2006	12
1.7 West European Wood Plastic Composite Demand by End-Use, 2006.....	14
1.8 Chinese Wood Plastic Composite Demand by End-Use, 2006	15
2.1 Thermoplastic Wood Composites.....	17
2.2 Example of a Deck Built with WPCs	18
3.1 North American Wood Plastic Composite Resin Use, 2006	21
3.2 Effect of a Coupling Agent on a Polypropylene/Wood Composite.....	29
3.3 Twin-Screw Geometry of a Co-Rotating System	31
3.4 “Conical” Twin-Screw Design	32
3.5 Plant for Producing Thermoplastic Wood Composite Pellets	33
3.6 In-Line WPC Profile Production	34
3.7 WPC Process without a Dryer	36
3.8 The Strandex Process.....	37
3.9 Creating and Printing Patterns on WPC Profiles	37
3.10 WPC Profiles	38
4.1 Cost Comparison of PE Wood Composites and PVC Wood Composites.....	43
4.2 Effect of Polyethylene Base Resin Cost on PE Wood Composite Economics.....	49
4.3 Effect of PVC Base Resin Cost on PVC Wood Composite Economics.....	50
5.1 Examples of Thermoplastic Wood Composites in Exterior Applications	52
5.2 Thermoplastic Wood Composites Used for Interior Trim.....	54
5.3 Thermoplastic Wood Composite Pallet	54
5.4 North American Wood Plastic Composite Demand by End Use, 2006	55
5.5 North American Wood Composites by Resin Source, 2006.....	57
5.6 West European Wood Plastic Composite Demand by End-Use, 2006.....	59

5.7	West European Wood Composites by Resin Source, 2006	60
5.8	Chinese Wood Plastic Composite Demand by End-Use, 2006	62
5.9	Chinese Wood Composites by Resin Source, 2006.....	63

Table	Page
1.1 First and Second Generation WPCs.....	5
1.2 Properties of an HDPE Composites at Different Wood Filler Concentrations.....	8
2.1 First and Second Generation WPCs.....	20
3.1 Selected Properties of Polyethylene.....	22
3.2 Selected Physical Properties of Polypropylene.....	23
3.3 Typical Commercial PVC Mechanical Properties.....	24
3.4 Typical General Purpose Polystyrene Resin Properties.....	24
3.5 Components of Various Natural Fibers	25
3.6 Average Properties of Wood Flour	25
3.7 Properties of an HDPE Composites at Different Wood Filler Concentrations.....	27
3.8 Mechanical Properties of Wood-Polypropylene Composites	28
4.1 USGC High Torque 58 mm and 92 mm Twin Screw WPC Capital Cost Estimate ..	42
5.1 WPC Applications	51
5.2 North American Demand Summary for Thermoplastic Wood Composites.....	56
5.3 North American Thermoplastic Wood Composite Producers	57
5.4 West European Demand Summary for Thermoplastic Wood Composites	59
5.5 Thermoplastic Wood Composite Producers	61
5.6 Chinese Demand Summary for Thermoplastic Wood Composites	63
5.7 Leading Chinese Thermoplastic Wood Composite Producers	64
