| Section                                                                    | Page      |
|----------------------------------------------------------------------------|-----------|
| <b>1 Executive Summary .....</b>                                           | <b>1</b>  |
| 1.1 OVERVIEW .....                                                         | 1         |
| 1.1.1 Why Gasify Biomass?.....                                             | 1         |
| 1.1.2 Definition of Biomass Gasification .....                             | 2         |
| 1.1.3 Relationships to Other Bioprocessing Technologies .....              | 3         |
| 1.1.4 Biofuels Limits – Biomass Abundance.....                             | 3         |
| 1.1.5 Role of Pyrolysis – Preparing Biomass for Logistics and Process .... | 5         |
| 1.2 DIRECT BIOMASS GASIFICATION .....                                      | 6         |
| 1.2.1 Overview .....                                                       | 6         |
| 1.2.2 Biomass Pyrolysis.....                                               | 7         |
| 1.2.3 CHOREN Carbo-V – Staged Gasification.....                            | 10        |
| 1.2.4 Pearson Technologies, Inc. ....                                      | 11        |
| 1.2.5 Other Biomass Gasification Technologies.....                         | 12        |
| 1.3 INDIRECT GASIFICATION .....                                            | 13        |
| 1.3.1 BCT - Pulse Enhanced™ Steam Reforming.....                           | 13        |
| 1.3.2 ThermoChem Recovery International, Inc. (TRI) .....                  | 14        |
| 1.4 BIOMASS FEEDSTOCKS .....                                               | 16        |
| 1.4.1 Biomass Components.....                                              | 16        |
| 1.4.2 Food-Fuel Competition.....                                           | 17        |
| 1.4.3 Biomass Types .....                                                  | 18        |
| 1.4.4 Biomass Supplies .....                                               | 19        |
| 1.5 ECONOMIC ANALYSIS .....                                                | 22        |
| 1.5.1 Interest in Higher Alcohols.....                                     | 22        |
| 1.5.2 Biobutanol from the Gasification of Biomass .....                    | 22        |
| 1.5.3 Biomass Gasification - Mixed Alcohols with Recycle .....             | 23        |
| <b>2 Introduction.....</b>                                                 | <b>24</b> |
| 2.1 THE POTENTIAL ROLE OF BIOMASS GASIFICATION .....                       | 24        |
| 2.2 DEFINITION OF BIOMASS GASIFICATION .....                               | 24        |
| 2.3 RELATIONSHIPS TO OTHER BIOPROCESSING TECHNOLOGIES ....                 | 25        |

|          |                                                                                           |           |
|----------|-------------------------------------------------------------------------------------------|-----------|
| 2.4      | DRIVERS FOR BIOMASS GASIFICATION .....                                                    | 26        |
| 2.4.1    | Broader Applicability and Feasibility .....                                               | 26        |
| 2.4.2    | Peak Oil.....                                                                             | 27        |
| 2.4.3    | Global Warming.....                                                                       | 28        |
| 2.4.4    | Others .....                                                                              | 29        |
| 2.5      | BIOFUELS LIMITS – BIOMASS ABUNDANCE .....                                                 | 32        |
| 2.6      | CO-GENERATION OF CHEMICALS, ELECTRICITY, AND HEAT.....                                    | 33        |
| 2.7      | LEVERAGING COAL GASIFICATION AND SYNGAS TECHNOLOGIES                                      | 33        |
| 2.8      | ROLE OF PYROLYSIS – PREPARING BIOMASS FOR LOGISTICS AND<br>PROCESS .....                  | 35        |
| <b>3</b> | <b>Biomass Gasification Technologies .....</b>                                            | <b>36</b> |
| 3.1      | OVERVIEW .....                                                                            | 36        |
| 3.2      | BIOMASS PYROLYSIS .....                                                                   | 38        |
| 3.2.1    | Pyrolysis Technologies .....                                                              | 40        |
| 3.3      | CHOREN CARBO-V – STAGED GASIFICATION .....                                                | 43        |
| 3.4      | PEARSON TECHNOLOGIES INC. ....                                                            | 45        |
| 3.5      | OTHER BIOMASS GASIFICATION TECHNOLOGIES .....                                             | 46        |
| 3.6      | INDIRECT GASIFICATION.....                                                                | 47        |
| 3.6.1    | BCT - Pulse Enhanced™ Steam Reforming.....                                                | 47        |
| 3.6.2    | ThermoChem Recovery International, Inc. (TRI) .....                                       | 48        |
| 3.7      | THERMAL EFFICIENCIES .....                                                                | 50        |
| 3.8      | SYNGAS FERMENTATION .....                                                                 | 50        |
| 3.8.1    | Biosyngas Fermentation with Carbon Monoxide Utilization, H <sub>2</sub><br>Byproduct..... | 50        |
| 3.9      | AIR SEPARATION - OXYGEN FOR GASIFICATION.....                                             | 54        |
| 3.9.1    | Conventional Cryogenic Processes.....                                                     | 54        |
| 3.9.2    | Pressure Swing Adsorption (PSA).....                                                      | 54        |
| 3.9.3    | Ion Transport Membrane (ITM) – APCI .....                                                 | 54        |
| 3.10     | STATUS OF TECHNOLOGY DEVELOPMENT – OTHER INITIATIVES                                      | 56        |
| 3.10.1   | GreenField Ethanol and Enkern (Canada) .....                                              | 57        |
| 3.10.2   | Range Fuels, Inc.....                                                                     | 58        |
| 3.10.3   | Energy Quest, Inc. - Syngas Energy Corp. (SEC) .....                                      | 58        |

|          |                                                          |           |
|----------|----------------------------------------------------------|-----------|
| 3.10.4   | Syntec Biofuel.....                                      | 59        |
| 3.10.5   | Sweden.....                                              | 59        |
| 3.10.6   | Coskata.....                                             | 60        |
| 3.10.7   | Other Gasifiers .....                                    | 60        |
| 3.11     | SYNGAS END USES.....                                     | 60        |
| 3.12     | LIQUID BIOFUELS - MIXED HIGHER ALCOHOLS SYNTHESIS (HAS)  | 61        |
| 3.12.1   | Overview.....                                            | 61        |
| 3.12.2   | Catalyst Technology Overview.....                        | 64        |
| 3.12.3   | Modified High Pressure Methanol Synthesis Catalysts..... | 65        |
| 3.12.4   | Modified Low Pressure Methanol Synthesis Catalysts ..... | 65        |
| 3.12.5   | Modified Fischer-Tropsch Catalysts.....                  | 67        |
| 3.12.6   | Alkali-Doped Sulfides, Mainly MoS <sub>2</sub> .....     | 68        |
| 3.12.7   | Molybdenum-Sulfide Catalysts .....                       | 68        |
| 3.12.8   | Pre-Reduced Molybdenum-Based Catalysts.....              | 69        |
| 3.12.9   | Other Catalysts.....                                     | 70        |
| 3.12.10  | Reactors.....                                            | 71        |
| 3.12.11  | Technology Developers .....                              | 72        |
| 3.13     | FISCHER-TROPSCH BIOGASOLINE .....                        | 74        |
| 3.13.1   | F-T Basics .....                                         | 74        |
| 3.13.2   | Mobil ETG.....                                           | 75        |
| 3.13.3   | Integration with Gasification – BIG-FT Gasoline .....    | 76        |
| 3.13.4   | Power and Heat.....                                      | 77        |
| 3.13.5   | Chemicals.....                                           | 77        |
| <b>4</b> | <b>Biomass Feedstocks.....</b>                           | <b>78</b> |
| 4.1      | BIOMASS COMPONENTS.....                                  | 78        |
| 4.2      | FOOD-FUEL COMPETITION .....                              | 78        |
| 4.3      | BIOMASS TYPES.....                                       | 80        |
| 4.3.1    | Definitions.....                                         | 80        |
| 4.3.2    | Corn Stover, Wheat Straw, Soybean Hulls etc. ....        | 80        |
| 4.3.3    | Virgin Wood and Wood Waste.....                          | 80        |
| 4.3.4    | Other Agricultural Wastes .....                          | 81        |

|                 |                                                                           |             |
|-----------------|---------------------------------------------------------------------------|-------------|
| 4.3.5           | Municipal Solid Waste.....                                                | 81          |
| 4.4             | BIOMASS SUPPLIES.....                                                     | 81          |
| 4.5             | DEVELOPMENTAL BIOMASS CROPS - SWITCHGRASS.....                            | 85          |
| 4.5.1           | Switchgrass Price.....                                                    | 86          |
| <b>5</b>        | <b>Economic Analysis .....</b>                                            | <b>91</b>   |
| 5.1             | INTEREST IN HIGHER ALCOHOLS .....                                         | 91          |
| 5.2             | BIOBUTANOL FROM THE GASIFICATION OF BIOMASS.....                          | 91          |
| 5.3             | BIOMASS GASIFICATION - MIXED ALCOHOLS WITH RECYCLE ...                    | 92          |
| 5.3.1           | Cost of Production Definition and Basis .....                             | 93          |
| 5.3.2           | Thermochemical Biobutanol Production .....                                | 94          |
| 5.3.3           | <i>n</i> -Butanol Production via Conventional Propylene Oxo Process ..... | 95          |
| 5.4             | CHEMICALS FROM BIO-SYNGAS.....                                            | 99          |
| 5.4.1           | Background.....                                                           | 99          |
| 5.4.2           | Renewable Products Purchasing Preferences .....                           | 99          |
| 5.4.3           | Bio-Olefins Production from Alcohols.....                                 | 100         |
| <b>Appendix</b> |                                                                           | <b>Page</b> |
