|---------------------------------------------------------------------|------|
| <b>1 Executive Summary</b> .....                                    | 1    |
| 1.1 INTRODUCTION .....                                              | 1    |
| 1.1.1 Background .....                                              | 1    |
| 1.1.2 Overview of Plastics Extrusion .....                          | 2    |
| 1.1.3 Basis for the Economics .....                                 | 3    |
| 1.2 COMPOUNDING .....                                               | 5    |
| 1.2.1 Economics & End-Use Markets .....                             | 5    |
| 1.3 BLOW FILM EXTRUSION .....                                       | 10   |
| 1.3.1 Economics & End-Use Markets .....                             | 11   |
| 1.4 THERMOFORMING .....                                             | 13   |
| 1.4.1 Economics & End-Use Markets .....                             | 14   |
| 1.5 BI-AXIALLY ORIENTED POLYPROPYLENE (BOPP) FILM .....             | 15   |
| 1.5.1 Economics & End-Use Markets .....                             | 16   |
| 1.6 INJECTION MOLDING OF COMMODITY AND TRANSITION<br>POLYMERS ..... | 17   |
| 1.6.1 Economics and End-Use Markets .....                           | 18   |
| 1.7 BLOW MOLDING .....                                              | 19   |
| 1.7.1 Economics & End-Use Markets .....                             | 21   |
| 1.8 PROFILE EXTRUSION .....                                         | 22   |
| 1.8.1 Economics & End-Use Markets .....                             | 22   |
| 1.9 WOVEN BAGS .....                                                | 23   |
| 1.9.1 Economics & End-Use Markets .....                             | 24   |
| <b>2 Introduction</b> .....                                         | 26   |
| 2.1 BACKGROUND .....                                                | 26   |
| 2.2 OVERVIEW OF PLASTICS EXTRUSION .....                            | 27   |
| 2.3 BASIS FOR THE ECONOMICS .....                                   | 31   |
| 2.3.1 Direct Fixed Costs .....                                      | 34   |
| 2.3.2 General Plant Overheads .....                                 | 34   |
| 2.3.3 Taxation .....                                                | 35   |
| 2.3.4 Corporate Overheads .....                                     | 35   |

|          |                                                                           |    |
|----------|---------------------------------------------------------------------------|----|
| <b>3</b> | <b>Compounding</b> .....                                                  | 36 |
| 3.1      | BACKGROUND .....                                                          | 36 |
| 3.2      | PROCESS DESCRIPTION .....                                                 | 36 |
| 3.3      | COMMON POLYPROPYLENE COMPOUND TYPES .....                                 | 41 |
| 3.3.1    | Mineral Filled Polypropylene .....                                        | 41 |
| 3.3.2    | Thermoplastic Olefinics (TPO).....                                        | 42 |
| 3.3.3    | Thermoplastic Vulcanizates (TPV).....                                     | 42 |
| 3.3.4    | Glass Fiber .....                                                         | 46 |
| 3.3.5    | Additive Masterbatches .....                                              | 49 |
| 3.4      | ADDITIVE CATEGORIES FOR POLYPROPYLENE COMPOUNDS .....                     | 51 |
| 3.4.1    | Mineral Filled.....                                                       | 51 |
| 3.4.2    | Thermoplastic Olefinics (TPOs) and Thermoplastic Vulcanizates (TPVs)..... | 52 |
| 3.4.3    | Glass Filled .....                                                        | 53 |
| 3.4.4    | Additive Concentrates.....                                                | 55 |
| 3.4.5    | Other Polypropylene Compounds.....                                        | 56 |
| 3.5      | TECHNOLOGY TRENDS IN COMPOUNDING .....                                    | 56 |
| 3.6      | ECONOMICS .....                                                           | 58 |
| 3.7      | END-USE MARKETS .....                                                     | 60 |
| 3.7.1    | Mineral Filled Polypropylene Compounds.....                               | 61 |
| 3.7.2    | TPOs .....                                                                | 63 |
| 3.7.3    | TPVs .....                                                                | 64 |
| 3.7.4    | Glass Reinforced Polypropylene Compounds .....                            | 64 |
| 3.7.5    | Other Polypropylene Compounds.....                                        | 66 |
| 3.7.6    | Illustrative Polypropylene Demand Patterns .....                          | 67 |
| <b>4</b> | <b>Blown Film Extrusion</b> .....                                         | 71 |
| 4.1      | BACKGROUND .....                                                          | 71 |
| 4.2      | PROCESS DESCRIPTION .....                                                 | 71 |
| 4.2.1    | Barrier Films .....                                                       | 73 |
| 4.2.2    | Materials .....                                                           | 73 |
| 4.3      | TECHNOLOGY TRENDS.....                                                    | 74 |
| 4.4      | ECONOMICS .....                                                           | 74 |
