| Section                                                         | Page      |
|-----------------------------------------------------------------|-----------|
| <b>1 Executive Summary .....</b>                                | <b>1</b>  |
| 1.1 BUSINESS OVERVIEW .....                                     | 1         |
| 1.2 PROCESS TECHNOLOGY .....                                    | 2         |
| 1.3 TECHNOLOGY LICENSING .....                                  | 3         |
| 1.3.1 Licensors .....                                           | 3         |
| 1.3.2 Non-Licensed Technologies in Use .....                    | 4         |
| 1.3.3 Hydrogenation.....                                        | 4         |
| 1.4 STRATEGIC CONSIDERATIONS .....                              | 5         |
| 1.4.1 Advantageous Factors .....                                | 5         |
| 1.4.2 Limiting Factors.....                                     | 5         |
| 1.5 PROCESS ECONOMICS.....                                      | 6         |
| 1.5.1 Summary of Cost Estimates.....                            | 7         |
| 1.5.2 Concluding Remarks.....                                   | 8         |
| 1.6 REGIONAL MARKET ANALYSIS .....                              | 8         |
| 1.6.1 <i>n</i> -Butanol Global Supply, Demand, and Trade.....   | 8         |
| 1.6.2 <i>Iso</i> -Butanol Global Supply, Demand, and Trade..... | 9         |
| 1.6.3 2-Ethylhexanol Global Supply, Demand, and Trade .....     | 9         |
| 1.6.4 2-Propylheptanol Global Supply, Demand, and Trade .....   | 10        |
| 1.6.5 Isononanol Global Supply, Demand, and Trade.....          | 10        |
| <b>2 Introduction.....</b>                                      | <b>11</b> |
| 2.1 COMMERCIAL TECHNOLOGY AND LICENSING OVERVIEW .....          | 12        |
| 2.1.1 Licensed Technologies.....                                | 12        |
| 2.1.2 Non-Licensed Technologies in Use .....                    | 13        |
| 2.1.3 Hydrogenation.....                                        | 13        |

|       |                                                                     |    |
|-------|---------------------------------------------------------------------|----|
| 2.2   | TECHNOLOGY DEVELOPMENTS .....                                       | 13 |
| 2.2.1 | Green Oxo Alcohols .....                                            | 13 |
| 2.3   | BUSINESS DEVELOPMENTS .....                                         | 14 |
| 2.4   | STRATEGIC CONSIDERATIONS .....                                      | 14 |
| 2.4.1 | Advantageous Factors .....                                          | 14 |
| 2.4.2 | Limiting Factors .....                                              | 15 |
| 2.5   | PHYSICAL AND THERMODYNAMIC PROPERTIES .....                         | 16 |
| 2.6   | HEALTH HAZARDS .....                                                | 16 |
| 2.7   | STORAGE AND TRANSPORTATION .....                                    | 17 |
| 2.8   | HEALTH, SAFETY, AND ENVIRONMENTAL CONCERNS ON<br>PLASTICIZERS ..... | 17 |
| 2.8.1 | Current Status .....                                                | 19 |
| 2.8.2 | EU Labeling .....                                                   | 19 |
| 2.8.3 | Rest of the World .....                                             | 22 |
| 2.8.4 | Summary of the Impact of Environmental Issues on Phthalates .....   | 22 |
| 3     | <b>Chemistry</b> .....                                              | 23 |
| 3.1   | RHODIUM PHOSPHINE CATALYSTS .....                                   | 27 |
| 3.2   | RHODIUM PHOSPHITE CATALYSTS .....                                   | 29 |
| 3.3   | PRODUCTS FROM OXO ALCOHOLS .....                                    | 33 |
| 4     | <b>Commercial Technologies</b> .....                                | 36 |
| 4.1   | DAVY/DOW LOW PRESSURE OXO <sup>SM</sup> PROCESS .....               | 39 |
| 4.1.1 | Process Description .....                                           | 39 |
| 4.1.2 | Process Features .....                                              | 41 |
| 4.2   | DAVY/DOW HIGH SELECTIVITY LP OXO <sup>SM</sup> PROCESS .....        | 41 |
| 4.2.1 | Process Description .....                                           | 41 |
| 4.2.2 | Process Features .....                                              | 43 |
| 4.3   | RHÔNE-POULENC/RUHRCHEMIE PROCESS .....                              | 44 |
| 4.3.1 | Process Description .....                                           | 44 |
| 4.3.2 | Process Features .....                                              | 46 |
| 4.4   | BASF PROCESS .....                                                  | 47 |
| 4.5   | MITSUBISHI PROCESS .....                                            | 48 |
| 4.6   | OTHER PROCESSES .....                                               | 48 |
| 4.7   | HYDROGENATION OF BUTANALS .....                                     | 50 |

|       |                                                                                    |     |
|-------|------------------------------------------------------------------------------------|-----|
| 4.8   | ALDOL CONDENSATION OF ALDEHYDES AND<br>HYDROGENATION OF THE ALKENALS.....          | 52  |
| 4.8.1 | 2-Ethylhexanol.....                                                                | 52  |
| 4.8.2 | 2-Propylheptanol.....                                                              | 54  |
| 4.9   | JOHNSON MATTHEY OXO ALCOHOLS PROCESS™ .....                                        | 56  |
| 4.9.1 | Hydroformylation .....                                                             | 58  |
| 4.9.2 | Rhodium Catalyst Harvesting.....                                                   | 58  |
| 4.9.3 | Hydrogenation.....                                                                 | 58  |
| 4.9.4 | Distillation and Hydrotreating.....                                                | 58  |
| 4.9.5 | Two-Pass Operation.....                                                            | 59  |
| 5     | <b>Developing Technologies</b> .....                                               | 60  |
| 5.1   | RECENT DEVELOPMENTS .....                                                          | 60  |
| 5.2   | ALTERNATIVE ROUTES TO OXO ALCOHOLS.....                                            | 60  |
| 5.2.1 | Oxo Alcohols from Butadiene .....                                                  | 61  |
| 5.2.2 | Biobutanol Production .....                                                        | 63  |
| 6     | <b>Process Economics</b> .....                                                     | 65  |
| 6.1   | COSTING BASIS.....                                                                 | 65  |
| 6.1.1 | Investment Basis .....                                                             | 65  |
| 6.1.2 | Pricing Basis .....                                                                | 65  |
| 6.1.3 | Cost of Production Basis.....                                                      | 67  |
| 6.2   | PRODUCTION COST ESTIMATES.....                                                     | 68  |
| 6.2.1 | Overview.....                                                                      | 68  |
| 6.2.2 | <i>n</i> -Butanol.....                                                             | 69  |
| 6.2.3 | 2-Ethylhexanol (2-EH).....                                                         | 78  |
| 6.2.4 | 2-Propylheptanol (2PH).....                                                        | 87  |
| 6.2.5 | Isononanol.....                                                                    | 92  |
| 6.3   | SUMMARY OF COST ESTIMATES.....                                                     | 96  |
| 6.4   | SENSITIVITY ANALYSES .....                                                         | 98  |
| 6.4.1 | Sensitivity of Production Cost to Historical Variation in<br>Propylene Prices..... | 98  |
| 6.4.2 | Sensitivity of Production Cost to Plant Scale .....                                | 99  |
| 6.5   | CONCLUDING REMARKS.....                                                            | 101 |
| 7     | <b>Commercial Applications</b> .....                                               | 102 |
| 7.1   | NORMAL-BUTANOL.....                                                                | 102 |

|           |                                       |            |
|-----------|---------------------------------------|------------|
| 7.2       | ISO-BUTANOL .....                     | 102        |
| 7.3       | 2-ETHYLHEXANOL .....                  | 102        |
| 7.4       | 2-PROPYLHEPTANOL .....                | 103        |
| 7.5       | ISONONANOL .....                      | 103        |
| <b>8</b>  | <b>Regional Market Analysis .....</b> | <b>104</b> |
| 8.1       | NORMAL-BUTANOL .....                  | 104        |
| 8.1.1     | Global Consumption .....              | 104        |
| 8.1.2     | Global Supply .....                   | 105        |
| 8.1.3     | Global Supply, Demand, and Trade..... | 107        |
| 8.1.4     | North America .....                   | 108        |
| 8.1.5     | Western Europe.....                   | 110        |
| 8.1.6     | Asia Pacific .....                    | 111        |
| 8.2       | ISOBUTANOL .....                      | 113        |
| 8.2.1     | Global Consumption .....              | 113        |
| 8.2.2     | Global Supply .....                   | 114        |
| 8.2.3     | Global Supply, Demand, and Trade..... | 116        |
| 8.3       | 2-ETHYLHEXANOL (2-EH) .....           | 117        |
| 8.3.1     | Global Consumption .....              | 117        |
| 8.3.2     | Global Supply .....                   | 118        |
| 8.3.3     | Global Supply, Demand, and Trade..... | 120        |
| 8.3.4     | North America .....                   | 122        |
| 8.3.5     | Western Europe.....                   | 123        |
| 8.3.6     | Asia Pacific .....                    | 125        |
| 8.4       | 2-PROPYLHEPTANOL (2-PH).....          | 127        |
| 8.4.1     | Global Consumption .....              | 127        |
| 8.4.2     | Global Supply .....                   | 128        |
| 8.4.3     | Global Supply, Demand, and Trade..... | 129        |
| 8.5       | ISONONANOL (INA).....                 | 130        |
| 8.5.1     | Global Consumption .....              | 130        |
| 8.5.2     | Global Supply .....                   | 131        |
| 8.5.3     | Global Supply, Demand, and Trade..... | 132        |
| <b>9</b>  | <b>Glossary .....</b>                 | <b>134</b> |

# CHEMSYSTEMS

## PERP PROGRAM

[www.chemsystems.com](http://www.chemsystems.com)

The ChemSystems Process Evaluation/Research Planning (PERP) program is recognized globally as the industry standard source for information relevant to the chemical process and refining industries. PERP reports are available as a subscription program or on a single report basis.

### Contact Details:

Nexant, Inc. ([www.nexant.com](http://www.nexant.com)) is a leading management consultancy to the global energy, chemical, and related industries. For over 38 years, ChemSystems has helped clients increase business value through assistance in all aspects of business strategy, including business intelligence, project feasibility and implementation, operational improvement, portfolio planning, and growth through M&A activities. Nexant has its main offices in San Francisco (California), White Plains (New York), and London (UK), and satellite offices worldwide.
