Section	Page
1 Executive Summary	1
1.1 OVERVIEW	1
1.2 DRIVERS OF BIOGAS AND LFG	1
1.3 TECHNOLOGY	1
1.3.1 Technology for Production	1
1.3.2 Technology for Use	3
1.4 ECONOMICS	4
1.5 CAPACITY ANALYSIS	5
1.6 IMPLICATIONS FOR THE CONVENTIONAL TECHNOLOGY	7
2 Introduction	8
2.1 OVERVIEW	8
2.2 LFG AND BIOGAS DRIVERS	8
2.2.1 Environmental Drivers	8
2.2.2 Political Drivers	9
2.2.3 Economic Drivers	11
3 Technology	12
3.1 OVERVIEW	12
3.2 ANAEROBIC DIGESTION	12
3.2.1 Technology Overview	13
3.2.2 Commercial AD Technologies	20
3.2.3 System Selection Criteria	33
3.3 LANDFILL GAS (LFG)	34
3.3.1 Landfilling	34
3.3.2 Landfill Gas	40

3.4	BIOGAS AND LFG APPLICATIONS.....	42
3.4.1	Overview	42
3.4.2	Cleaning	45
3.4.3	Upgrading to Pipeline	46
3.4.4	Heat and Electricity Generation	56
4	Economics	64
4.1	METHODOLOGY	64
4.1.1	Capital Cost Elements	64
4.1.2	Operating Cost Elements	67
4.2	COMPARATIVE ECONOMICS	70
4.2.1	To Pipeline Gas	70
4.2.2	To Electricity	75
4.3	COST OF PRODUCTION ESTIMATES.....	80
4.3.1	To Pipeline Gas	80
4.3.2	To Electricity	88
4.4	SENSITIVITIES	96
4.4.1	For Pipeline Gas	96
4.4.2	To Electricity	99
5	Capacity Analysis	102
5.1	OVERVIEW	102
5.2	CAPACITY ANALYSIS.....	102
6	Implications for Conventional Technology	111
6.1	SCALES AND MARKETS	111
6.1.1	Downstream Markets	111
6.1.2	Feedstock Markets	112
6.2	MARGINS AND RETURNS.....	113
6.2.1	By Region	113
6.2.2	By Technology.....	116
6.2.3	Overall	117
7	References	118

Figure	Page
1.1 Basic Anaerobic Digestion System Flow Diagram	2
1.2 Vertical Gas Extraction Well Schematic	3
1.3 Overall Comparative Economics to Pipeline Gas by Region	4
1.4 Overall Comparative Economics to Electricity by Region	5
1.5 Global Biogas Production 2012-2021	5
1.6 Breakdown of European Biogas Production by Country	6
1.7 Overall Comparison of Returns	7
3.1 Basic Anaerobic Digestion System Flow Diagram	13
3.2 Anaerobic Digestion Process	14
3.3 Material Flow in an AD system	16
3.4 Energy Flow in an AD System	16
3.5 Biogas Yield m ³ /Ton of Feedstock	17
3.6 Spectrum for Solid Content in AD System	18
3.7 A Typical AD Process Flow Diagram	21
3.8 SMARTFERM Dry AD System	23
3.9 The Kompogas System	25
3.10 Valorga Process Diagram	26
3.11 Process Scheme of BTA Single Stage Reactor	27
3.12 Process Scheme of BTA Multi-stage Reactor	28
3.13 Linde High Solids Digestion	29
3.14 Schematic of Maltin System	30
3.15 Linde Wet Digestion	31
3.16 The WASSA Process Diagram	32
3.17 Modern Sanitary Landfill	35
3.18 A Typical Open Dump Site	36
3.19 U.S. MSW Landfill Tipping Fees by Year	37
3.20 Typical LFG Composition	40
3.21 Vertical Gas Extraction Well Schematic	41
3.22 Horizontal Gas Extraction Well Schematic	42
3.23 Typical Biogas Composition (by Volume)	42
3.24 Process Flow Diagram for LFG and Biogas Use	44
3.25 Simplified Amine Scrubber	47
3.26 Simplified Pressure Swing Adsorber Schematic	49
3.27 Membrane Separation Unit	50

3.28	Schematic of a Water Scrubber	52
3.29	Schematic of a Physical Scrubber	53
3.30	Cryogenic Separation Unit Schematic	55
3.31	CHP Plant Flow Diagram	59
3.32	Example CHP Plant Energy Balance	60
3.33	Gas Turbine Combined Cycle CHP	62
3.34	IC Engine CHP	63
4.1	North American Comparative Economics to Pipeline Gas by Process	70
4.2	South American Comparative Economics to Pipeline Gas by Process	71
4.3	Chinese Comparative Economics to Pipeline Gas by Process	72
4.4	Western Europe Comparative Economics to Pipeline Gas by Process	72
4.5	Anaerobic Digestion Comparative Economics to Pipeline Gas by Region	73
4.6	LFG Comparative Economics to Pipeline Gas by Region	73
4.7	Overall Comparative Economics to Pipeline Gas by Region	74
4.8	Overall Comparative Economics to Pipeline Gas by Process	75
4.9	North American Comparative Economics to Electricity by Process	75
4.10	South American Comparative Economics to Electricity by Process	76
4.11	Chinese Comparative Economics to Electricity by Process	76
4.12	Western Europe Comparative Economics to Electricity by Process	77
4.13	Anaerobic Digestion Comparative Economics to Electricity by Region	77
4.14	LFG Comparative Economics to Electricity by Region	78
4.15	Overall Comparative Economics to Electricity by Region	79
4.16	Overall Comparative Economics to Electricity by Process	79
4.17	Primary Feedstock Sensitivity for Pipeline Gas	96
4.18	Byproduct Sensitivity for Pipeline Gas	96
4.19	Utility Sensitivity for Pipeline Gas	97
4.20	Capital Sensitivity for Pipeline Gas	97
4.21	Operating Rate Sensitivity for Pipeline Gas	98
4.22	Economy of Scale Sensitivity for Pipeline Gas	98
4.23	Primary Feedstock Sensitivity for Electricity	99
4.24	Byproduct Sensitivity for Electricity	99
4.25	Utility Sensitivity for Electricity	100
4.26	Capital Sensitivity for Electricity	100
4.27	Operating Rate Sensitivity for Electricity	101
4.28	Economy of Scale Sensitivity for Electricity	101

5.1	Global Biogas Production 2012-2021	102
5.2	Breakdown of European Biogas Production by Country	103
5.3	Breakdown of Biogas Production Method	103
5.4	Breakdown of Gross Electricity Production from Biogas in Europe by Country	104
5.5	Breakdown of Electricity Generation from Biogas Production Method	104
5.6	Breakdown of Gross Heat Production from Biogas in Europe by Country	105
5.7	Breakdown of Heat Generation from Biogas Production Method	105
5.8	Breakdown of Biogas Upgrading Plants in Europe	106
5.9	Breakdown of Upgrading Technology	106
5.10	LMOP Landfill Gas Energy Project and Candidate Landfill Map	107
5.11	Breakdown of the Waste in Place of Operational Projects	108
5.12	Breakdown of LFG use in the United States	108
5.13	End-Use Applications for Biogas in the U.S.	109
6.1	Global Biogas Production 2012-2021	111
6.2	U.S. and Rest of the World Natural Gas Production	112
6.3	Comparison of Returns in North America	113
6.4	Comparison of Returns in South America	114
6.5	Comparison of Returns in China	115
6.6	Comparison of Returns in Western Europe	115
6.7	Comparison of Returns for Anaerobic Digestion	116
6.8	Comparison of Returns for LFG	116
6.9	Overall Comparison of Returns	117

Table	Page
3.1 Biogas Composition for Different Substrates	15
3.2 Biogas Potential of Different Feedstocks	17
3.3 Batch versus Continuous AD System	18
3.4 Anaerobic Digestion Operating Parameters.....	19
3.5 Single Stage versus Multi Stage AD System	20
3.6 Commercial AD Technologies.....	33
3.7 Biogas Yield of AD Designs Treating MSW	34
3.8 Landfill Classifications	35
3.9 U.S. Landfill Tipping Fees	37
3.10 Landfill Tipping Fees in Europe by Country	39
3.11 Typical Composition of Biogas, LFG, and Natural Gas	43
3.12 LFG and Biogas Cleaning Requirements.....	45
3.13 Power and CHP Technology Comparison	57
3.14 Comparison of CHP Systems.....	58
4.1 Cost of Production Estimate for Pipeline Gas via Anaerobic Digestion in N. America	80
4.2 Cost of Production Estimate for Pipeline Gas via LFG in N. America	81
4.3 Cost of Production Estimate for Pipeline Gas via Anaerobic Digestion in S. America	82
4.4 Cost of Production Estimate for Pipeline Gas via LFG in S. America.....	83
4.5 Cost of Production Estimate for Pipeline Gas via Anaerobic Digestion in China.....	84
4.6 Cost of Production Estimate for Pipeline Gas via LFG in China	85
4.7 Cost of Production Estimate for Pipeline Gas via Anaerobic Digestion in W. Europe	86
4.8 Cost of Production Estimate for Pipeline Gas via LFG in W. Europe	87
4.9 Cost of Production Estimate for Electricity via Anaerobic Digestion in N. America	88
4.10 Cost of Production Estimate for Electricity via LFG in N. America.....	89
4.11 Cost of Production Estimate for Electricity via Anaerobic Digestion in S. America	90
4.12 Cost of Production Estimate for Electricity via LFG in S. America.....	91
4.13 Cost of Production Estimate for Electricity via Anaerobic Digestion in China.....	92
4.14 Cost of Production Estimate for Electricity via LFG in China	93
4.15 Cost of Production Estimate for Electricity via Anaerobic Digestion in W. Europe	94
4.16 Cost of Production Estimate for Electricity via LFG in W. Europe	95
6.1 Margins and Returns for LFG and Biogas to Power and Pipeline Quality Gas	113

NexantThinking™

Biorenewable Insights

Nexant, Inc. (www.nexantthinking.com) is a leading management consultancy to the global energy, chemical, and related industries. For over 38 years, Nexant has helped clients increase business value through assistance in all aspects of business strategy, including business intelligence, project feasibility and implementation, operational improvement, portfolio planning, and growth through M&A activities. Nexant has its main offices in San Francisco (California), White Plains (New York), and London (UK), and satellite offices worldwide.

Contact Details:

New York: Steven Slome

Phone: + 1-914-609-0379, e-mail: sslome@nexant.com

New York: Heidi Junker Coleman, Global Programs Support Manager

Phone: + 1-914-609-0381, e-mail: hcoleman@nexant.com
