

PPE: Market Dynamics - Olefins 2017

Market Dynamics Olefins - 2017 is one in a series of reports published annually as part of the Petroleum and Petrochemical Economics (PPE) program.

This report provides an in-depth analysis of the olefins chain including:

- Ethylene
- Propylene
- Butadiene

Published: May 2017

Abstract:

The global olefins markets remained in good health in 2016, with limited capacity addition and stable consumption growth providing high levels of profitability and high operating rates. The drop in oil prices has radically reduced the differentials in profitability in different regions. The Middle East producers with the most advantaged feedstock still have the lowest costs, although prices have remained sufficiently high to provide good returns for naphtha-based operators around the world, and also keep the new coal-based market entrants in China in operation.

The differentials between olefin values were abnormally high during much of 2016, with ethylene prices very high, and those for propylene and butadiene very low. Propylene values have been depressed by the surge in production from MTO/MTP in China, and more importantly PDH in several regions. Butadiene was in oversupply mostly due to the influence from low natural rubber prices, although both the natural rubber and butadiene markets tightened rapidly in late 2016, providing a significant co-product return for naphtha-based cracker operators.

Global Ethylene Supply, Demand and Trade
Million tons

Table of Contents:

1. Executive Summary
2. The Olefins Industry
 - 2.1. Global Overview
 - 2.2. Current Industry Performance
3. Ethylene
4. Propylene
5. Butadiene
- Appendix
 - A. Methodology
 - B. The Olefins Industry – Technology

Chapters 3 to 5 are segmented by key geographic region:

- North America
- South America
- Western Europe
- Central Europe
- Eastern Europe
- Middle East
- Africa
- Asia Pacific

Each region/country is further segmented by:

- Consumption: Assesses historic and forecast consumption; forecasts are based on projections of end use and economic activity.
- Supply: Includes a list of all producers, their production capacity, location, etc, and discussion of the status of new projects.
- Supply, Demand and Trade: Provides historical analysis and forecasts to 2035 of consumption, production, imports/exports, inventory build-up/decline, capacity and capacity utilization.

This analysis will identify the issues shaping the industry, as well as provide an independent appraisal of the market.

Along with the written report, NexantThinking™ Online Database includes supply, demand and trade analysis for 41 countries.

Subscription Details:

Subscription to **Olefins - 2017** includes:

- One hard copy report
- 12 month access via the NexantThinking website, to:
 - Unlimited downloads of soft copy reports
 - Downloadable data in Excel from the Online Database
- Webinar (scheduled June 2017)
- Consultation time with the project team

Customized subscriptions are available.

NexantThinking™

NexantThinking reports and subscription programs provide clients with comprehensive analytics, forecasts and insights for the chemicals, polymers, energy and cleantech industries. Using a combination of business and technical expertise, with deep and broad understanding of markets, technologies and economics, NexantThinking provides solutions that our clients have relied upon for over 50 years.

Global in scope, Nexant serves its clients from over 30 offices located throughout the Americas, Europe, the Middle East, Africa and Asia.
